

Walther Model 4

exploded views: 7.65 mm

By E. J. HOPPSCHMIT
Compiled by Dennis Hunter

The Carl Walther firm of Zella M. B., East Germany, has among the world's foremost pistol makers. They brought out Germany's first 20-cal. automatic pistol in 1948. In 1952 they introduced the 22-cal. Model 1, which in its early years replaced the Model 1 and called it the Model 4.

While only in production for about 12 years, the Model 4 was issued several times and over one hundred thousand were manufactured and used during WW 2. Model 4 pistols were used first by WW 2 German officers and a post-war model was used during WW 3. They were made, built made, reliable, and had a very simple operation system. Thousands of all variants of the Model 4 were brought back by returning GIs in WW 2. Some were thousands were captured by Germans before the advent of the 1940 cal. 4, producing the importance of each pistol.

As shown, the first Model 4 was simply a Model 1 pistol with a longer barrel and grip. The larger size made the pistol much more powerful than a military standard, increasing the magazine capacity to eight rounds (plus a round in the chamber) per the Model 4's standard capacity. Lengthening the barrel resulted in a longer sighting radius.

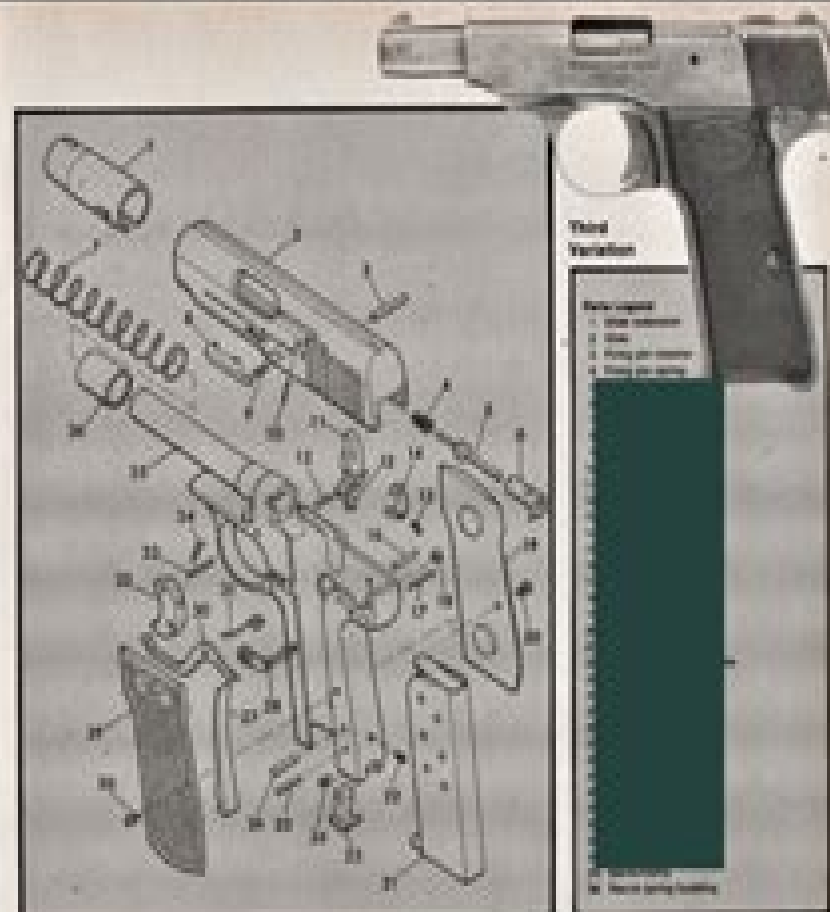

After the first five barrel guns, the slide was redesigned to simplify the lubrication and tighten the pistol. The second version (shown in the exploded view) is probably the most common version of the Model 4. This second over-revision version went through a finalizing number of different slide markings and minor changes. The shape of the trigger gun was changed to remove some and in some later ones a rear sight was inserted into a dovetail slot on the slide.

Extensive editions are in WW 2 pointed up the need for some design changes, so the Model 4 came again in the following form for the third and last major revision: the trigger gun the trigger bar that connects the trigger to the gun, was totally lost to us open and added into the frame. It was exposed to the operator and only released by the left grip. The last revision of the Model 4 carried this trigger bar made the frame on the left grip. It was no longer exposed. Slide variations were changed from wide for grooves to a series of 10 deep "V" variations.

The Model 4 was eventually replaced in the Walther line by the more modern design of the late 1930s and 70s.
