Towards Greater Freedom And Happiness:

Towards Greater Freedom & Happiness Alfred A. Barrios, 1978-01-01 *A Greater Freedom* Stephan Kampowski, 2014-02-27 How does biotechnology touch on human destiny What are its promises and challenges In search for a response the present volume turns to the thought of Hans Jonas one of the pioneers and founding fathers of bioethics The continued relevance of his ideas is exemplified by the way Jurgen Habermas applies them to the current debate The chief promise of biotechnology is to increase our freedom by overcoming the limits of the human condition The main risk of biotechnology as both Jonas and Habermas see it is to diminish or outright abolish our capacity for responsibility and morality It is argued that the greater freedom is not simply freedom from constraints but freedom for our destiny the freedom to be the benevolent responsible and spontaneous authors of our lives capable of communion and love The touchstone for evaluating any biotechnological procedure has to be this greater freedom *A Journey Towards Greater Happiness* Venkatachala I. Sreenivas M.D., 2014-10-06 Happiness like health is our natural state of being Health is not a burden for us unlike its oppositedisease Since we are most comfortable in our natural state we seek happiness which is not a burden To be happy what is needed is to eliminate unhappiness which is an intruder It is similar to getting rid of a disease and health automatically makes its appearance Unhappiness is an intruder and it intrudes as a penalty we have to pay for transgressing the law of creation The law is that the creation is an integrated interrelated organic whole just like a human body Every cell works for the benefit of the whole body and the body does everything to protect and preserve each and every cell resulting in happy harmonious coexistence We transgress this law and create disharmony by feeling and acting as independent separate isolated entities from the rest of the creation Thus we are violating the law because of our ignorance Unhappiness is the penalty we pay for transgressing the law that the whole of the creation is an integrated interrelated organic whole The remedy To be happy we should live in conformity with the law of creation namely that the creation is an integrated interrelated organic whole To live in conformity with the law we have to bring about a cognitive change in our thinking and the resulting changed thinking should be followed by a transformation in our lives The change requires us to become more and more inclusive by developing divine qualities like kindness compassion sharing etc and shunning the opposite qualities We are free either to conform or resist the law of creation The choice is ours In summary we are responsible for our happiness *Foundations of Freedom* Simon R. Clarke, 2012 What makes individual freedom valuable People have always believed in freedom have sought it and have sometimes fought and died for it The belief that it is something to be valued is widespread But does this belief have a rational foundation This book examines answers to these questions that are based on the welfare of the person whose freedom is at stake There are various conceptions of a worthwhile life a life that is valuable for the person whose life it is These conceptions will be examined to see whether they are plausible and what their connection if any is to freedom Are they compelling foundations for freedom Does freedom make a person's life better or

would his her welfare be advanced by restricting freedom
