TOWIE - The Only Way Is Eton Mitchell Agg,2016-03-25 Why don t young people vote It s a question that has been asked by pollsters for years The 18 to 24 year old demographic records the lowest voter turnout at elections and it doesn t look to be showing signs of stopping Being one of this demographic Mitchell Agg looks into this question and tries to shed light on why his peers don t enter polling stations on election day Through four main reasons Mitchell helps us answer this question as well as giving some solutions **Starry Speculative Corpse** Eugene Thacker,2015-04-24 Could it be that the more we know about the world the less we understand it Could it be that while everything has been explained nothing has meaning Extending the ideas presented in his book In The Dust of This Planet Eugene Thacker explores these and other issues in Starry Speculative Corpse But instead of using philosophy to define or to explain the horror genre Thacker reads works of philosophy as if they were horror stories themselves revealing a rift between human beings and the unhuman world of which they are part Along the way we see philosophers grappling with demons struggling with doubt and wrestling with an indifferent cosmos At the center of it all is the philosophical drama of the human being confronting its own limits Not a philosophy of horror but a horror of philosophy Thought that stumbles over itself as if at the edge of an abyss Starry Speculative Corpse is the second volume of the Horror of Philosophy trilogy together with the first volume In The Dust of This Planet and the third volume Tentacles Longer Than Night *Garcian Meditations* Jon Cogburn,2017-03-08 The publication of Form and Object A Treatise on Things by Tristan Garcia Prix de Flore winning novelist philosopher essayist and screenwriter is a genuine event in the history of philosophy Situating this event within classical modern and contemporary dialectical space Jon Cogburn evaluates Garcia s metaphysics differential ontology and militant anti reductionism through a series of seemingly incompatible oppositions substance process analysis dialectic simple whole and

The Political Possibility of Sound Salomé Voegelin,2018-11-01 The essay is the perfect format for a crisis Its porous and contingent nature forgives a lack of formality while its neglect of perfection and virtuosity releases the potential for the incomplete and the unrealizable These seven essays on The Political Possibility of Sound present a perfectly incomplete form for a discussion on the possibility of the political that includes creativity and invention and articulates a politics that imagines transformation and the desire to embrace a connected and collaborative world The themes of these essays emerge from and deepen discussions started in Voegelin s previous books Listening to Noise and Silence and Sonic Possible Worlds Continuing the methodological juxtaposition of phenomenology and logic and writing from close sonic encounters each represents a fragment of listening to a variety of sound works to music the acoustic environment and to poetry to hear their possibilities and develop words for what appears impossible As fragments of writing they respond to ideas on geography and migration bring into play formless subjectivities and trans objective identities and practice collectivity and a sonic cosmopolitanism through the hearing of shared volumes They involve the unheard and the in between to contribute to current discussions on new materialism and perform vertical readings to reach the depth of sound

Quiet Avant-Garde Danila Cannamela,2019-03-19 The blending of people and living machines is a central element in the futurist reconstruction of the universe However prior to the futurist break a group of early twentieth century poets later dubbed crepuscolari crepusculars had already begun an attack against the dominant cultural system using their poetry as the locus in which useless little objects clashed with the traditional poetry of human greatness and stylistic perfection The Quiet Avant Garde draws from a number of twenty first century theories vital materialism object oriented ontology and environmental humanities as well as Bruno Latour s criticism of modernity to illustrate how the crepuscular movement sabotaged the modern mindset and launched the counter discourse of the Italian avant garde by blurring the line dividing people from things This liminal poetics at the crossroad of tradition modernism and the avant garde acted as the initiator of the ethical and environmental transition from a universe subjected to humans to human thing co agency This book proposes a contemporary reading of Italian twentieth century movements and offers a foothold for scholars outside Italian studies to access authors who are still unexplored in North American literature

The Adventure of Relevance Martin Savransky,2016-06-16 At a time where the relevance of the social sciences is under threat this innovative book offers a speculative experimentation on the philosophy and methodology of the social sciences to rethink what relevance is and to cultivate a new ethos of knowledge making for an eventful world Engaging a diverse a range of thinkers including Alfred North Whitehead Gilles Deleuze and Isabelle Stengers as well as the American pragmatists John Dewey and William James

Martin Savransky challenges longstanding assumptions in the social sciences and argues that relevance is an event that is part and parcel of the immanent and situated processes by which things come to matter. He develops new conceptual tools for cultivating an empiricist ethos of inquiry that is attuned to the question of how things come to matter, an ethics that turns social inquiry into a veritable adventure. The result is an original and rigorous book that infuses knowledge practices in the social sciences with new sensibilities, creative possibilities, and novel habits of thinking, knowing, and feeling. *Can Architecture Be an Emancipatory Project?* Nadir Z. Lahiji, 2016-03-25

Can architectural discourse rethink itself in terms of a radical emancipatory project? And if so, what would be the contours of such a discourse? *The Material Imagination* Matthew Mindrup, 2016-03-03

In recent years, architectural discourse has witnessed a renewed interest in materiality under the guise of such familiar tropes as material honesty, form finding, or digital materiality. Motivated in part by the development of new materials and an increasing integration of designers in fabricating architecture, a proliferation of recent publications from both practice and academia explore the pragmatics of materiality and its role as a protagonist of architectural form. Yet as the ethos of material pragmatism gains more popularity, theorizations about the poetic imagination of architecture continue to recede. Compared to an emphasis on the design of visual form in architectural practice, the material imagination is employed when the architect thinks matter dreams in it, lives in it, or in other words, materializes the imaginary. As an alternative to a formal approach in architectural design, this book challenges readers to rethink the reverie of materials in architecture through an examination of historical precedent, architectural practice, literary sources, philosophical analyses, and everyday experience. Focusing on matter as the premise of an architect's imagination, each chapter identifies and graphically illustrates how material imagination defines the conceptual premises for making architecture. *Digitalizing the Global Text* Paul Allen Miller, 2020-01-07

A few years ago, globalism seemed to be both a known and inexorable phenomenon. With the end of the Cold War, the opening of the Chinese economy, and the ascendancy of digital technology, the prospect of a unified flow of goods and services, and of people and ideas, seemed unstoppable. Political theorists such as Francis Fukuyama proclaimed that we had reached the end of history. Yes, there were pockets of resistance and reaction, but these were told would be swept away in a relentless tide of free markets and global integration that would bring Hollywood, digital finance, and fast food to all. Religious fundamentalism, nationalism, and traditional sexual identities would melt away before the forces of modernity and empire. A relentless technocratic rationality would sweep all in its wake, bringing a neoliberal utopia of free markets, free speech, and increasing productivity. Nonetheless, as we have begun to experience the backlash against a global world founded on digital fungibility, the perils of appeals to nationalism, identity, and authenticity have become only too apparent. The collapse of Soviet Communism left an ideological vacuum that offered no recognized place from which to oppose global capitalism. What is the alternative? The anxieties and resentments produced by this new world order among those left behind are often manifested in assertions of xenophobia and particularity. This is what it supposedly means to be

really American truly Muslim properly Chinese The other is coming to take what is ours and we must defend ourselves
Digitalizing the Global Text is a collection of essays by an international group of scholars situated squarely at this nexus of forces Together these writers examine how literature culture and philosophy in the global and digital age both enable the creation of these simultaneously utopian and dystopian worlds and offer a resistance to them A joint publication from the University of South Carolina Press and the National Taiwan University Press *Nineteenth Century Prose*, 2018

Deleuze and Design Betti Marenko, 2015-06-08 Drawing on a range of contributors case studies and examples this book examines how we can think about design through Deleuze and how Deleuze's thought can be re-designed to produce new concepts It taps into the emerging networks between philosophy as an act of inventing concepts and design as the process of inventing the world The Fidelity of Reason: A Phenomenological Metaphysics of Self, Nature and Divinity Felix Ó Murchadha, 2025-04-01 The book reveals a phenomenological metaphysics which places it at the cutting edge of contemporary work on phenomenology It addresses the crisis of world that is all around us as the meaning structures relating to self nature and divinity all seem to be undermined politically and socially within the current reality of climatic geo-political and ideology turmoil In addressing these issues this text argues for a renewed understanding of reason as a fidelity to world understood as faithfulness to the being and value of self nature and divinity The account of the self engages with contemporary and older phenomenological discussions Husserl Heidegger Ricoeur Henry Zahavi as well as debates in the Philosophy of Mind the account of nature ranges over Schelling's Naturphilosophie Whitehead Philosophy of Quantum Physics and Bruno Latour the section on divinity engages with debates in Anthropology and the History of Religion as well as within the so-called theological turn and theological discussions of ecology This book is directed at scholars working within the fields of phenomenology philosophy of nature philosophy of self philosophical theology philosophy of religion and metaphysics as well as upper undergraduate and graduate students in philosophy ecological studies and theology The Literature of Exclusion Andrew C. Wenaus, 2021-05-05 In the early twentieth century the Dadaists protested against art nationalism the individual subject and technologized war With their automatic anti-art and cultural disruptiveness Dadaists sought to signify no-thing Today data also operates autonomously However rather than dismantling tradition data organizes selects combines quantifies and simplifies the complexity of actuality Like Dada data also signifies nothing While Dadaists protest with purpose data proceeds without intention The individual in the early twentieth century agonizes over the alienation from daily life and the fear of being converted into a cog in a machine Today however the individual in twenty-first century supermodernity merges not with large industrial machinery but with the processual and procedural logic of programming with innocuous ease Both exclude human agency from self-narration but to differing degrees of abstraction Examining the work of B.R. Yeager Samuel Beckett Jeff Noon Kenji Siratori Mike Bonsall Allison Parrish and narratives written by artificial intelligence Wenaus considers the threshold of sensible narration and the effects that the shift from a

culture of language to a culture of digital code has on lived experience While data offers a closed system Dadaist literature of exclusion he suggests promises a future of open hyper contingent unprescribed alternatives for self narration **Homage to Peasant Smallholders** Brian Morris,2022-07-22 This book offers the reader a portrait a representation no less of the social life and culture of the peasant smallholders of the Shire Highlands situated in Southern Malawi It explores the relationship between the people of the Shire Highlands and the natural landscape in all its diversity and dynamic complexity It is an ethnographic study focussing specifically on the peasant smallholders of the Highlands who constitute around 80 per cent of the current population and their complex multi faceted relationship to the land and its diverse biota **At the Limits of the Political** Inna Viriasova,2018-03-16 The question of the limits of the political permeates the history of western political thought and has been at the forefront of debates in contemporary political philosophy especially in French and Italian contexts This book argues that the question of radical political exteriority fell into neglect despite post War critiques of totalitarian political ontology The notion of the political developed into a new form of totality one which admits the impossibility of closure and yet refuses to let go of its totalizing ambition Viriasova addresses this problem by offering a critical introduction to the debate on the concept of the political in contemporary continental philosophy and develops an innovative perspective that allows us to rethink the limits of the political in affirmative and realist terms The book explores such recent developments as Roberto Esposito s notion of the impolitical Giorgio Agamben s concept of bare life Michel Henry s radical phenomenology of life the speculative realist philosophy of Quentin Meillassoux as well as Buddhist political thought The book makes a vital contribution to an emerging body of literature in contemporary philosophy that renews the fundamental questions of political ontology in response to the multiplying crises of inclusion that challenge democratic communities today **Anatomy of Thought-Fiction** Joanna Demers,2017-07-28 In the year 2214 the Center for Humanistic Study has discovered an unpublished manuscript by Joanna Demers a musicologist who lived some two centuries before Her writing interrogates the music of artists ranging from David Bowie and Scott Walker to Kanye West and The KLF Questioning how people of the early twenty first century could have believed that music was alive and that music was simultaneously on the brink of extinction light is shed on why the United States subsequently chose to eliminate the humanities from universities and to embrace fascism
