through a building and the movements of the human body from room to room Time this book argues is the framework for our spatial experience of architecture and a key dimension of a building s structure and significance Building Time presents twelve close readings of buildings and artworks which explore this idea Examining works by distinctive modern architects from Eileen Gray to Ivarø Siza and Wang Shu it takes the reader in some cases literally step by step through a built work and provides insightful reflections on the importance of making space for time in architectural design This is a book for both theorists and for architectural designers Through it theorists will find a way to rethink the fundamental premises and aims of design work while designers will rediscover the order and ideas that shape the world around them its buildings interiors and landscapes

Architecture and Sacrament David Wang, 2020-03-25 David Wang s Architecture and Sacrament considers architectural theory from a Christian theological perspective specifically the analogy of being analogia entis The book tracks social and cultural reasons why the theological literature tends to be separate from contemporary architecture theory Wang argues that retrieval of the sacramental outlook embedded within the analogy of being which informed centuries of art and architecture in the West can shed light on current architectural issues such as big box stores the environmental crisis and the loss of sense of community The book critiques the materialist basis of current architectural discourse subsumed largely under the banner of critical theory This volume on how European ideas inform architectural theory complements Wang s previous book A Philosophy of Chinese Architecture Past Present Future and will appeal to architecture students and academics as well as those grappling with the philosophical moorings of all built environments

From Song Dynasty Capital to the challenge of Cultural Capital in contemporary China Xiaoling Dai, Anna Irene Del Monaco, Wenbo Yu, 2017-12-29 Hangzhou is a very special city for Italian architects who want to learn about historical and contemporary architecture and about the urban challenges in contemporary China There are further issues that we would like to investigate about Hangzhou in the future and in order to do that it would be interesting to involve further experts such as archaeologists and hydrologists given the special presence of historical relics water and several issues which still deserve a better enhancement Design Research in Architecture Murray Fraser, 2021-07-28 What is the role of design research in the types of insight and knowledge that architects create That is the central question raised by this book It acts as the introductory overview for Ashgate's major new series Design Research in Architecture which has been created in order to establish a firm basis for this emerging field of investigation within architecture While there have been numerous architects scholars since the Renaissance who have relied upon the interplay of drawings models textual analysis intellectual ideas and cultural insights to scrutinise the discipline nonetheless until recently there has been a reluctance within architectural culture to acknowledge and accept the role of design research as part of the discourse However in many countries around the world one of the key changes in architecture and architectural education over the last decade has been the acceptance of design as a legitimate research area in its own right and this new series provides a forum where the best proponents of architectural design research can publish their work This volume provides a broad overview on design research that supports and amplifies the different volumes coming out in the book series It brings together leading architects and academics to discuss the more general issues involved in design research At the end there is an Indicative Bibliography which alludes to a long history of architectural books which can be seen as being in the spirit of design research Sustainable Buildings and Structures Jun Xia, 2015-10-07 Sustainable Buildings and Structures collects the contributions presented at the 1st International Conference on Sustainable Buildings and Structures Suzhou China 29 October 1 November 2016 The book aims to share thoughts and ideas on sustainable approaches to urban planning engineering design and construction The topics discussed include
