Cheese and Culture Paul Kindstedt,2012-04-01 Behind every traditional type of cheese there is a fascinating story By examining the role of the cheesemaker throughout world history and by understanding a few basic principles of cheese science and technology we can see how different cheeses have been shaped by and tailored to their surrounding environment as well as defined by their social and cultural context Cheese and Culture endeavors to advance our appreciation of cheese origins by viewing human history through the eyes of a cheese scientist There is also a larger story to be told a grand narrative that binds all cheeses together into a single history that started with the discovery of cheese making and that is still unfolding to this day This book reconstructs that 9000 year story based on the often fragmentary information that we have available Cheese and Culture embarks on a journey that begins in the Neolithic Age and winds its way through the ensuing centuries to the present This tour through cheese history intersects with some of the pivotal periods in human prehistory and ancient classical medieval renaissance and modern history that have shaped western civilization for these periods also shaped the lives of cheesemakers and the diverse cheeses that they developed The book offers a useful lens through which to view our twenty first century attitudes toward cheese that we have

inherited from our past and our attitudes about the food system more broadly This refreshingly original book will appeal to anyone who loves history food and especially good cheese *Ancient Mesopotamia at the Dawn of Civilization* Guillermo Algaze, 2009-05-15 The alluvial lowlands of the Tigris and Euphrates rivers in southern Mesopotamia are widely known as the cradle of civilization owing to the scale of the processes of urbanization that took place in the area by the second half of the fourth millennium BCE In *Ancient Mesopotamia at the Dawn of Civilization* Guillermo Algaze draws on the work of modern economic geographers to explore how the unique river based ecology and geography of the Tigris Euphrates alluvium affected the development of urban civilization in southern Mesopotamia He argues that these natural conditions granted southern polities significant competitive advantages over their landlocked rivals elsewhere in Southwest Asia most importantly the ability to easily transport commodities In due course this resulted in increased trade and economic activity and higher population densities in the south than were possible elsewhere As southern polities grew in scale and complexity throughout the fourth millennium revolutionary new forms of labor organization and record keeping were created and it is these socially created innovations Algaze argues that ultimately account for why fully developed city states emerged earlier in southern Mesopotamia than elsewhere in Southwest Asia or the world **The Book of Peace** American Peace Society, 1845 Sixty four tracts compiled and edited by George C Beckwith corresponding secretary of the American Peace Society Each tract is separately as well as consecutively paged
