War Is A Force That Gives Us Meaning:

War Is a Force that Gives Us Meaning Chris Hedges, 2014-04-08 General George S Patton famously said Compared to war all other forms of human endeavor shrink to insignificance God I do love it so Though Patton was a notoriously single minded general it is nonetheless a sad fact that war gives meaning to many lives a fact with which we have become familiar now that America is once again engaged in a military conflict War is an enticing elixir It gives us purpose resolve a cause It allows us to be noble Chris Hedges of The New York Times has seen war up close in the Balkans the Middle East and Central America and he has been troubled by what he has seen friends enemies colleagues and strangers intoxicated and even addicted to war s heady brew In War Is a Force That Gives Us Meaning he tackles the ugly truths about humanity s love affair with war offering a sophisticated nuanced intelligent meditation on the subject that is also gritty powerful and unforgettable A Fatal Addiction Thomas Block, 2012 America one of the most religious countries in the world is also the most violent Do God and war define the American spirit as much as apple pie and baseball This unsettling book illustrates how bellicose war like language is used to explain the spiritual quest It explores the violence of God tradition as it exists in all religions including Buddhism and then examines how this dynamic is flipped with political leaders using spiritual and religious language to sell war to the general public Although God and religion have often been used to sell war in the United States this has been especially true since 9 11 After surveying the relationship of war and the spiritual quest in the major world religions this study concludes with an overview of how that dynamic has affected the contemporary American public discourse on war Does this intermingling of war and spirituality prepare the population for the coming of war The institutional blending of the sacred and human aggression appear to be fundamental to human society The second section of the book concentrates on the political language and speeches of American politicians since 2002 following the run up to the Iraq war and its continuation over the past decade showing how this mystical war conflation permeates American society

Muslim Perspectives on Islamophobia Zouhir Gabsi, 2024-08-06 The Islamic positioning of Islamophobia is presented in this book Through Islamic or Muslim perspectives the book engages with various Islamic texts and discourses spoken and written emanating from preachers and scholars of Islam to discuss the points of convergence and divergence with the Western interpretation of the phenomenon The book aims to look at Islamophobia from a hitherto unexplored angle by first analyzing the points of convergence and divergence between the internal Muslim and external Western perspectives and then by providing new approaches to curbing Islamophobia through a holistic spiritual dimension of Islam and cultural memory The book contends that the bridges of understanding between the East and the West can only be built if some of Islam s theological concepts such as the place of reason in Islam are reinterpreted by considering the Islamic perspectives While the book acknowledges previous work on Islamophobia it contributes to a deeper understanding of Islamophobia in its internal and external manifestations by considering the theoretical frameworks of racism and xenophobia Readers interested

in Islamic studies and anti racism narratives would find this book s eclectic approach and balanced perspective of the phenomenon informative and enlightening

Young Men and Masculinities Victor J. Seidler, 2013-07-04 In this book Victor J Seidler one of the leading contributors to the growing debate about masculinities turns his attention to the lives of young men and their understandings of themselves as gendered beings By contextualizing their experiences and subjectivities within a rapidly globalizing world Seidler pays particular attention to the impact of the global media How does the mass circulation of images of men s bodies desires and sexualities affect their self perception and behaviours and how are these images framed within particular histories cultures and traditions Questioning universalist theories of hegemonic masculinities the book argues that young men often feel caught between prevailing masculinities and their own struggle for self definition It explores both how the idea of men as the First Sex has been established within the West and the ways in which men in other cultures and societies affirm their gendered identities Seidler pioneers new methodologies that involve listening to the silences surrounding male experience as well as to oral testimonies This enables innovative analysis of the contradictions young men are faced with in both creating their own gendered identities and establishing more equal relationships within a world of intense inequalities
