Analysis of Operational Feasibility and Maintenance Management of Power Plant in Timor Leste Tjokorda Gde Tirta Nindhia, Duarte da Costa Sarmento , I Gusti Ngurah Nitya Santhiarsa, Dewa Ngakan Ketut Putra Negara, 2024-08-17 Since the founding of the state of Timor Leste on the 20th of May 2002 the Timor Leste

government has begun to reform society to participate in developing the people's mentality from the worst of colonialism and prolonged war. One very important aspect in mental development is unconditional peace between society and its invaders and war enemies. So that society can improve itself in participating in physical development with a focus on economic cooperation in all fields to increase the people's economic growth. One of the physical aspects that the community is looking forward to is a source of electrical energy which the community needs to utilize in order to boost the family economy. So the Timor Leste Government built high voltage network infrastructure traveling throughout the territory of Timor Leste. In this way it will be easier to distribute electrical energy to the community to be used for lighting and to stimulate the family economy with various home industry activities. So two central electrical energy generators were established in Hera and Betano known as Electricidade de Diesel de Timor Leste which is shortened to EDTL. So two EDTL centers were built in Hera with 7 units of diesel engines for generating electrical energy with a total capacity of 119 MW and began operating in December 2011. Then the EDTL center in Betano with 8 units of diesel engines with a total capacity of 136 MW and began operating in February 2012. Each diesel engine unit generating electrical energy at the two EDTL centers in Hera and Betano has a capacity of 17 MW per engine unit. With the construction of these two EDTL centers the State of Timor Leste and its people will not lack electrical energy. So that in the current era electrical energy has enormous benefits to boost the people's economy through family household industrial activities and for the nation and state to move the wheels of the economy through offices, hospitals, banks, ports, airports, hotels, figures, and also for planning small industry and industrial mega projects that are being planned in the southern part of Timor Leste, namely 3 pillars consisting of Supply Base, Oil Refinery, and LNG for community prosperity.

Pounder's Marine Diesel Engines and Gas Turbines Doug Woodyard, 2009-08-18. Since its first appearance in 1950, Pounder's Marine Diesel Engines has served seagoing engineers, students of the Certificates of Competency examinations, and the marine engineering industry throughout the world. Each new edition has noted the changes in engine design and the influence of new technology and economic needs on the marine diesel engine. Now in its ninth edition, Pounder's retains the directness of approach and attention to essential detail that characterized its predecessors. There are new chapters on monitoring control and HiMSEN engines as well as information on developments in electronic controlled fuel injection. It is fully updated to cover new legislation including that on emissions and provides details on enhancing overall efficiency and cutting CO₂ emissions. After experience as a seagoing engineer with the British India Steam Navigation Company, Doug Woodyard held editorial positions with the Institution of Mechanical Engineers and the Institute of Marine Engineers. He subsequently edited *The Motor Ship* journal for eight years before becoming a freelance editor specializing in shipping, shipbuilding, and marine engineering. He is currently technical editor of *Marine Propulsion and Auxiliary Machinery*, a contributing editor to *Speed at Sea*, *Shipping World*, and *Shipbuilder*, and a technical press consultant to Rolls Royce Commercial Marine. Helps engineers to understand the latest changes to marine diesel engines. Careful

organisation of the new edition enables readers to access the information they require Brand new chapters focus on monitoring control systems and HiMSEN engines Over 270 high quality clearly labelled illustrations and figures to aid understanding and help engineers quickly identify what they need to know
