Silence is my Habitat Jessica White,2025-09-30 A tactile and olfactory journey through a silent ecosystem Jessica White has been deaf since she was four years old Where an autobiography or biography narrates the story of a person s life an ecobiography dwells on a person s interaction with their ecosystem and how this shapes their sense of self The essays that follow detail how deafness encouraged and shaped her relationship with the natural world Deafness made me observant and quiet Because I could not hear enough to join in on conversations my attention often wandered or was absorbed by sensations other than sound morning sun on my forearms the thick sweet scent of flowering oleanders the triangular shadow of a flock of galahs flying overhead On the long bus trips between school and home I watched the sorghum burnishing as it ripened and kangaroos bounding through wheat stubble in the late afternoons into trees that cast long shadows I felt the bus shake as it rattled over cattle grids or veered into the corrugations on the gravel roads These essays consider how deafness shapes the interfaces between the writer and particular environments given how she can only hear particular sounds as she navigates the world through the tactile and olfactory

Local Places, Global Processes Peter Coates,David Moon,Paul Warde,2016-02-29 We live in an age of unprecedented environmental change global interconnected and universal Yet though our lives are inextricably connected to global processes and increasingly mobile we still live in particular places Our perceptions of change and what kind of change might be for good or ill are shaped by the interaction of localised experience and the wider forces of transformation Local Places Global Processes examines how these relationships have been shaped in Britain over time in three ways First through essays addressing influential ways of understanding and debating questions of the state of nature These are complemented by case studies on conservation landscape change and management and how perceptions of environmental change have emerged or been discarded over time Chapters also draw on a series of site based workshops that brought together historians landscape managers and artists to discuss and reflect on particular sites Wicken Fen in Cambridgeshire owned by the National Trust and the first British nature reserve the Quantock Hills Area of Outstanding Natural Beauty in Somerset England s first AONB and a landscape enriched by Romantic association and the landscape of Kielder Water and Forest a land of superlatives in Northumberland in north eastern England the largest planted forest and

artificial lake in northern Europe The multi disciplinary approach draws together the exchanges artworks and writing assembled at these workshops and afterwards This opens up how being in a place and engaging with ideas attached to it shape perceptions of the environment It provides resources with which landscape managers can think about their tasks and engage various publics in discussion about future environments in light of these histories of place Rather than a history of these three places this is history written from them Strokes of Genius Eric Chaline,2017-08-15 What could be better than diving into cool water on a hot day In this enormously enjoyable and informative history of swimming Eric Chaline sums up this most summery of moments with one phrase pleasure beckons at the water s edge Strokes of Genius traces the history of swimming from the first civilizations to its current worldwide popularity as a sport fitness pastime and leisure activity Chaline explores swimming s role in ritual early trade and manufacturing warfare and medicine before describing its transformation in the early modern period into a leisure activity and a competitive sport the necessary precursors that have made it the most common physical pastime in the developed world The book celebrates the physicality and sensuality of swimming attributes that Chaline argues could have contributed to the evolution of the human species Swimming like other disciplines that use repetitive movements to train the body and quiet the mind is also a means of spiritual awakening a personal journey of discovery Swimming has attained the status of a cultural marker denoting eroticism leisure endurance adventure exploration and excellence Strokes of Genius shows that there is not a single story of human swimming but many currents that merge diverge and remerge Chaline argues that swimming will become particularly important as we look toward a warmer future in which our survival may depend on our ability to adapt to life in an aquatic world **Recovery Magazine, April 2012** Mike Stillwell,2012-05-09 An Alcohol Recovery Magazine produced by the Relapse Prevention Group in Stevenage Herts *Leap In* Alexandra Heminsley,2017-07-04 At once inspiring hilarious and honest the new book from Alexandra Heminsley chronicles her endeavor to tackle a whole new element and the ensuing challenges and joys of open water swimming It s a meditative act they said But it was far from meditative for Alexandra Heminsley when yet another wave slammed into her face It was survival When she laced up her shoes in Running Like a Girl all she had to do to become a runner was to get out there and run But swimming was something else entirely The water was all consuming confusing her every move sabotaging every breath Determined Alexandra would learn to adapt find new strengths and learn to work with the water She does not want to stand on the beach looking at the sea any longer She wants to leap in In doing so she will learn not just how to accept herself but how to accept what lay beyond Soon she will be able to see water anywhere in the world and sense not fear but adventure She will dive into water as she hopes to dive into life And it has nothing to do with being sporty or being the correct shape for a swimsuit Open water swimming is currently one of the fastest growing sports in the world and marathon swimming is the only sport where men and women do not race in separate categories The water welcomes all who are willing and prepared to take part and as Alexandra shows in her wondrous and funny book not knowing

how to do something is not necessarily a weakness strength lies within the desire to learn The time is now to leap in and revel in what you thought was beyond you discovering that it was only ever you holding you back
