The Information Specialist's Guide to Searching and Researching on the Internet and the World Wide Web Ernest Ackermann,Karen Hartman,2014-06-11 Written by a professor of computer science and a reference librarian this guide covers basic browser usage e mail and discussion groups discusses such Internet staples as FTP and Usenet newsgroups presents and compares numerous search engines and includes models for acquiring evaluating and citing resources within the context of a research project The emphasis of the book is on learning how to create search strategies and search expressions how to evaluate information critically and how to cite resources All of these skills are presented as within the context of step by step activities designed to teach basic Internet research skills to the beginner and to hone the skills of the seasoned practitioner

Lithium-Ion Cells Yury Koshtyal ,Alexander Rummyantsev,2024-12-24 A large quantity of articles and books have been published on the designated topics However most of the literary sources describe the results of scientific articles on the synthesis and study of perspective materials reveal circuit and design solutions for constructing control systems and manufacturing batteries and are educational materials At the same time a small part of the published sources includes the following descriptions of materials produced industrially and used in the LIC manufacturing process demonstrations of the industrially produced LIC energy and power parameters analysis of the characteristics of manufactured miniature lithium ion cells solid state LICs lithium metal cells and all solid state cells as well as others Considering the popularity of the discussed topics one can hope to find detailed information on the Internet Indeed modern search engines make it possible to locate a sufficiently large number of relevant documents However while conducting such research we encountered the following challenges the data are somewhat fragmented and their systematization and structuring are required search results do not always meet search queries For instance data that were relevant to the topic were found but they did not match the query as accumulated data grow the search time for new information extends the choice of search engine and location different countries affects search results the data are not indexed in search engines

although the correct keywords and website were requested the information disappears due to website updates and the found data require additional processing For example many presentations show changes in the shape of the discharge curves depending on the discharge current strength In addition however Ragone plots are necessary for a correct comparison and therefore the mathematical processing of presented results is required Thus this book was written to systematize and structure information on industrially produced materials for LIC manufacturing and industrially produced and promising LICs and lithium metal rechargeable cells for various applications
