Tourism Critical Concepts in the Social Sciences is an accessible and comprehensive resource designed for academics and scholars researching in tourism globalization and human geography *Tourism and Development* Richard Sharpley, David J. Telfer, 2002-04-30 The development of tourism is frequently justified on the basis of its potential contribution to the broader socio economic development of destination areas Indeed tourism is generally considered an effective vehicle of development yet the meaning and objectives of development and the extent to which it can be achieved through tourism is rarely questioned Moreover the relationship between tourism and development remains an under represented area of study and research This book addresses this gap in the literature by challenging many of the widely held assumptions about tourism s developmental contribution In the first part a theoretical link is established between the discrete yet interconnected disciplines of tourism studies and development studies More specifically the meaning of development and successive development paradigms are considered within the context of tourism This provides a conceptual foundation for the second part of the book which addresses a number of fundamental issues related to tourism s potential contribution to development These include issues of economic development regional development socio cultural development and environmental development Finally the third part focuses upon barriers to tourism induced development arguing that a new political economy of tourism the consumption of tourism and the dominance of the sustainable development paradigm represent significant counterpoints to overly simplistic models of tourism s potential contribution to development *Tourism, Environment, and Development of Garhwal Himalaya* Devesh Nigam, 2002

establishes the foundation for the book exploring the meaning and objectives of development reviewing theoretical perspectives on the developmental process and assessing the reasons why less developed countries are attracted to tourism as a development option The concept of sustainable development as the most widely adopted contemporary model of development is then introduced and its links with tourism critically assessed Subsequent chapters explore the key issues associated with tourism and development including the rise of globalization the tourism planning and development process the relationship between tourism and communities within which it is developed the management implications of trends in the demand for and uptake of tourism and an analysis of the consequences of tourism development for destination environments economies and societies A new chapter considers the challenges of climate change sustainability of resource supply oil water and food global economic instability political instability and changing demographics Finally the issues raised throughout the book are drawn together in a concluding chapter that assesses the tourism and development dilemma Combining an overview of essential concepts theories and knowledge with an analysis of contemporary issues and debates in tourism and development this new edition will be an invaluable resource for those investigating tourism issues in developing countries The book will be of interest to students of tourism development geography and area studies international relations and politics and sociology

Mining Heritage and Tourism Michael Conlin, Lee Jolliffe, 2010-10-04 Many former mining areas have now lost their industrial function and are now turning to tourism for regional revitalization and community economic development The transformation process of these industrial and in some cases derelict mining sites and landscapes into an

area of interest for tourists is a major challenge both for planners and for tourism managers. It involves complex consideration to both the preservation of the physical site and community mining heritages as well as the health safety and environmental factors inherent in opening these vast sites to the public. Mining Heritage and Tourism includes contributions from internationally recognized authorities and is the first book to focus on the issues, challenges and potentials in redeveloping mines as cultural heritage attractions which are explored thematically throughout the book. It draws on multidisciplinary research to consider the dichotomy between heritage preservation and tourist development goals for mining heritage sites as well as to explore the practical challenges of developing these sites. These themes are illustrated by case studies from a vast range of geographical locations around the globe to offer operational insights into the planning and management of these sites for both heritage and tourism purposes as well as innovative site management techniques. There has never before been a more comprehensive book on mining heritage tourism representing the latest developments in strategy, policy and practices.
