Toward Equity In Quality In Mathematics Education:

Toward Equity in Quality in Mathematics Education Murad Jurdak, 2009-07-30 Educational equity and quality are not only research issues which cut across different disciplines but are major determinants of socio economic and human development in both industrial and developing countries The status and role of mathematics a subject which has long enjoyed a privileged status in school curricula worldwide due to its perceived role in science and technology render equity and quality in mathematics education at the heart of human development This is reflected by governments relatively large investments in improving the quality of mathematics education and extending it to marginalized and underprivileged groups The purpose of *Toward Equity in Quality in Mathematics Education* is four fold First the book examines the constructs of equity and quality and their interdependence from different perspectives Second it develops a conceptual framework for studying and analyzing the two constructs Third it examines consolidates and re structures the literature on equity and quality in mathematics education Finally using data from TIMSS 2003 the book investigates the within and across country impact of the different equity related factors on mathematics achievement in a sample of countries representative of worldwide geographical and cultural regions *Towards Equity in Quality in Mathematics Education* uses a multi dimensional conceptual framework to study and analyze issues in equity and quality The framework consists of five perspectives hypothesized as determinants of equity in quality in mathematics education Mathematical societal educational ideological and genetic The framework can be thought of as a pyramid with mathematics as its base and the societal educational ideological and genetic perspectives as its faces Thus each point within this pyramid represents a unique equity in quality situation i e with different coordinates with respect to mathematical societal educational ideological and genetic perspectives *Towards Equity in Quality in Mathematics Education* is useful for teachers and researchers in mathematics education

Mapping Equity and Quality in Mathematics Education Bill Atweh, Mellony Graven, Walter Secada, Paola Valero, 2011-01-06 Concerns about quality mathematics education are often posed in terms of the types of mathematics that are worthwhile and valuable for both the student and society in general and about how to best support students so that they can develop this mathematics Concerns about equity are about who is excluded from the opportunity to develop quality mathematics within our current practices and systems and about how to remove social barriers that systematically disadvantage those students This collection of chapters summarises our learning about the achievement of both equity and quality agendas in mathematics education and to move forward the debate on their importance for the field

Toward Equity and Social Justice in Mathematics Education Tonya Gau Bartell, 2018-08-14 This critical volume responds to the enduring challenge in mathematics education of addressing the needs of marginalized students in school mathematics and stems from the 2015 Annual Meeting of the North American Group of the Psychology of Mathematics Education PME NA This timely analysis brings greater clarity and support to such challenges by narrowing in on four foci theoretical and political perspectives toward equity and justice in mathematics

education identifying and connecting to family and community funds of knowledge student learning and engagement in preK-12 mathematics classrooms and supporting teachers in addressing the needs of marginalized learners Each of these areas examines how race class culture power justice and mathematics teaching and learning intersect in mathematics education to sustain or disrupt inequities and include contributions from scholars writing about mathematics education in diverse contexts Included in the coverage Disrupting policies and reforms to address the needs of marginalized learners A socio-spatial framework for urban mathematics education Linking literature on allywork to the work of mathematics teacher educators Transnational families mathematical funds of knowledge Multilingual and technological contexts for supporting learners mathematical discourse Preservice teachers strategies for teaching mathematics with English learners Toward Equity and Social Justice in Mathematics Education is of significant interest to mathematics teacher educators and mathematics education researchers currently addressing the needs of marginalized students in school mathematics It is also relevant to teachers of related disciplines administrators and instructional designers interested in pushing our thinking and work toward equity and justice in mathematics education

Refractions of Mathematics Education Christer Bergsten, Bharath Sriraman, 2015-05-01 The diversity of research in mathematics education has been addressed as both a problem and a strength When manifested through adherence to different intellectual roots and theoretical orientations diversions constitute refractions of mathematics education The collection and analysis of empirical data in a study are by necessity refracted through the specific analytical lens employed as well as the aim of the study itself Refractions can also refer to looking at old phenomena through new lenses The chapters in this book are refracted through philosophical political mathematical and personal lenses by distinguished authors in the field addressing issues about the elusive experience of doing mathematics purification of texts refractions mathematics and ethnomathematics political messages in textbook tasks mathematics education policy debate the political in mathematics education research philosophy and mathematics meanings and representations identity of mathematical modeling and dilemmas in the teaching of calculus An ancient Sanskrit adage states that Knowledge is something that grows when shared but shrinks when hoarded Academics engaged in the generation of new Knowledge are blessed with both the time and the freedom to engage in pursuits that allow for intellectual pleasure As a phenomenon of the Zeitgeist many have succumbed to the increased corporatization of academic work engaging in activities for monetary and self-advancement purposes Are there any real intellectuals left in academia? Adorno Bourdieu Chomsky Foucault among others This Festschrift is dedicated to academics that don't bother with self-promotion or aggrandizement of themselves or their ideas in simplistic terms

Educators of the Mediterranean... ..Up Close and Personal Ronald G Sultana, 2012-01-01 A score of prominent educators from South Europe and the Middle East and North Africa region speak about their upbringing their educational and professional journeys their academic achievements and their struggles in order to enhance democracy justice and equity in their countries and across the Mediterranean The interviews in this volume shed

light on educational movements challenges and aspirations in a region that is attaining increasing importance geo politically and in comparative and international studies These are powerful and critical voices providing readers with fresh often unexpected insights about contexts cultures and convictions that deserve global attention The interviews with these men and women inform intrigue but above all inspire calling as they do for an earnest commitment to a vision of education as a transformative democratising force In contrast to the global totalising discourse that has increasingly defined education in narrowly economic terms here are the beginnings of alternative agendas inviting citizens to read and decode the world around them and to confront power wherever it lies In doing so the educators in this volume draw upon and put at our disposal a wide array of theoretical lenses nimbly weaving these within a narrative that speaks about a lifetime lived in the hope of making a difference These then are vivid engaging and reflexive accounts emerging from contexts where democracy has only recently taken root if at all and from a region that has come to symbolize the return of the political and the reclaiming of the public sphere as a site for transformation contestation revolt and hope Access and Equity Dorothy Y. White, Anthony M. A. Fernandes, Marta Civil, 2018 *Towards Equity in Mathematics Education* Helen Forgasz, Ferdinand Rivera, 2012-03-21 This volume gathers together twenty major chapters that tackle a variety of issues associated with equity in mathematics education along the dimensions of gender culture curriculum diversity and matters of a biological nature The pursuit of equity in mathematics education is an important concern in the history of the present Since there is no doubt about the significant role of mathematics in almost every aspect of life it means that all individuals regardless of sex in any age range and in whatever context need to be provided with an opportunity to become mathematically able The publication of this Springer volume on equity in mathematics education is situated at a time when there is strong and sustained research evidence indicating the persistence of an equity gap in mathematics which has now enabled the mathematics education community to engage in a discourse of access for all The research studies that are reported and discussed in the volume have been drawn from an international group of distinguished scholars whose impressive forward looking and thought provoking perspectives on relevant issues incite broaden and expand complicated conversations on how we might effectively achieve equity in mathematics education at the local institutional and systemic levels Further the up to date research knowledge in the field that is reflected in this volume provides conceptual and practical outlines for mechanisms of change including models examples and usable theories that can inform the development of powerful equitable practices and the mobilization of meaningful equity interventions in different contexts of mathematics education **The Proceedings of the 12th International Congress on Mathematical Education** Sung Je Cho, 2015-02-10 This book comprises the Proceedings of the 12th International Congress on Mathematical Education ICME 12 which was held at COEX in Seoul Korea from July 8th to 15th 2012 ICME 12 brought together 3500 experts from 92 countries working to understand all of the intellectual and attitudinal challenges in the subject of mathematics education as a multidisciplinary research and practice This work aims to

Mathematics Learning in Early Childhood National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Committee on Early Childhood Mathematics, 2009-11-13 Early childhood mathematics is vitally important for young children s present and future educational success Research demonstrates that virtually all young children have the capability to learn and become competent in mathematics Furthermore young children enjoy their early informal experiences with mathematics Unfortunately many children s potential in mathematics is not fully realized especially those children who are economically disadvantaged This is due in part to a lack of opportunities to learn mathematics in early childhood settings or through everyday experiences in the home and in their communities Improvements in early childhood mathematics education can provide young children with the foundation for school success Relying on a comprehensive review of the research Mathematics Learning in Early Childhood lays out the critical areas that should be the focus of young children s early mathematics education explores the extent to which they are currently being incorporated in early childhood settings and identifies the changes needed to improve the quality of mathematics experiences for young children This book serves as a call to action to improve the state of early childhood mathematics It will be

especially useful for policy makers and practitioners those who work directly with children and their families in shaping the policies that affect the education of young children *Invited Lectures from the 13th International Congress on Mathematical Education* Gabriele Kaiser,Helen Forgasz,Mellony Graven,Alain Kuzniak,Elaine Simmt,Binyan Xu,2018-02-05 The book presents the Invited Lectures given at 13th International Congress on Mathematical Education ICME 13 ICME 13 took place from 24th 31st July 2016 at the University of Hamburg in Hamburg Germany The congress was hosted by the Society of Didactics of Mathematics Gesellschaft f r Didaktik der Mathematik GDM and took place under the auspices of the International Commission on Mathematical Instruction ICMI ICME 13 the biggest ICME so far brought together about 3500 mathematics educators from 105 countries additionally 250 teachers from German speaking countries met for specific activities The scholars came together to share their work on the improvement of mathematics education at all educational levels The papers present the work of prominent mathematics educators from all over the globe and give insight into the current discussion in mathematics education The Invited Lectures cover a wide spectrum of topics themes and issues and aim to give direction to future research towards educational improvement in the teaching and learning of mathematics education This book is of particular interest to researchers teachers and curriculum developers in mathematics education

Integrating Gender Equity Into Mathematics Curriculum and Teacher Education Incikabi, Lutfi,2025-10-01 Integrating gender equity into mathematics curriculum and teacher education creates more inclusive learning environments Mathematics is often perceived and taught as a gender neutral subject yet disparities in participation achievement and confidence among students of different genders reveal the influence of biases and systemic barriers Addressing these issues requires an examination of what is taught and how with a focus on challenging stereotypes promoting diverse role models and fostering equitable classroom practices For teacher education programs this means preparing future educators to recognize gender based assumptions use inclusive pedagogies and cultivate classroom cultures that support all learners Integrating gender equity into mathematics education is essential for unlocking students full potential Integrating Gender Equity Into Mathematics Curriculum and Teacher Education explores how gender equity can be integrated into mathematics curriculum and teacher education to address systemic biases and promote inclusive learning environments It examines the impact of gender on student participation and achievement and how teacher preparation can equip educators to use equitable teaching practices This book covers topics such as gender bias educational assessments and educational policy and reform and is a useful resource for educators sociologists policymakers academicians researchers and scientists **Critical Mathematics Education** Paul Ernest,Bharath Sriraman,Nuala Ernest,2016-01-01 Mathematics is traditionally seen as the most neutral of disciplines the furthest removed from the arguments and controversy of politics and social life However critical mathematics challenges these assumptions and actively attacks the idea that mathematics is pure objective and value neutral It argues that history society and politics have shaped mathematics not only through its applications and uses but

also through molding its concepts methods and even mathematical truth and proof the very means of establishing truth Critical mathematics education also attacks the neutrality of the teaching and learning of mathematics showing how these are value laden activities indissolubly linked to social and political life Instead it argues that the values of openness dialogicality criticality towards received opinion empowerment of the learner and social political engagement and citizenship are necessary dimensions of the teaching and learning of mathematics if it is to contribute towards democracy and social justice This book draws together critical theoretic contributions on mathematics and mathematics education from leading researchers in the field Recurring themes include The natures of mathematics and critical mathematics education issues of epistemology and ethics Ideology the hegemony of mathematics ethnomathematics and real life education Capitalism globalization politics social class habitus citizenship and equity The book demonstrates the links between these themes and the discipline of mathematics and its critical teaching and learning The outcome is a groundbreaking collection unified by a shared concern with critical perspectives of mathematics and education and of the ways they impact on practice *Access and Equity* Anthony M. A. Fernandes, Sandra Crespo, Marta Civil, 2017
