Toward A Composition Made Whole Pitt Comp Literacy Culture:

Toward a Composition Made Whole Jody L. Shipka, 2011-04-30 To many academics composition still represents typewritten texts on 8 5 x 11 pages that follow rote argumentative guidelines In *Toward a Composition Made Whole* Jody Shipka views composition as an act of communication that can be expressed through any number of media and as a path to meaning making Her study offers an in depth examination of multimodality via the processes values structures and semiotic practices people employ every day to compose and communicate their thoughts Shipka counters current associations that equate multimodality only with computer digitized or screen mediated texts which are often self limiting She stretches the boundaries of composition to include a hybridization of aural visual and written forms Shipka analyzes the work of current scholars in multimodality and combines this with recent writing theory to create her own teaching framework Among her methods Shipka employs process oriented reflection and a statement of goals and choices to prepare students to compose using various media in ways that spur their rhetorical and material awareness They are encouraged to produce unusual text forms while also learning to understand the composition process as a whole Shipka presents several case studies of students working in multimodal composition and explains the strategies tools and spaces they employ She then offers methods to critically assess multimodal writing projects *Toward a Composition Made Whole* challenges theorists and compositionists to further investigate communication practices and broaden the scope of writing to include all composing methods While Shipka views writing as crucial to discourse she challenges us to always consider the various purposes that writing serves

Forum-Based Role Playing Games as Digital Storytelling Csenge Virág Zalka, 2019-03-28 When people hear the term role playing games they tend to think of two things a group of friends sitting around a table playing Dungeons Dragons or video games with exciting graphics Between those two however exists a third style of gaming Hundreds of online forums offer gathering places for thousands of players people who come together to role play through writing They create stories by taking turns describing events through their characters eyes Whether it is the arena of the Hunger Games the epic battles of the Marvel Universe or love stories in a fantasy version of New York people build their own spaces of words and inhabit them day after day But what makes thousands of players many teenagers among them voluntarily type up novel length stories How do they use the resources of the Internet gather images sounds and video clips to weave them into one coherent narrative How do they create together through improvisation and negotiation in ways that connect them to older forms of storytelling Through observing more than a hundred websites and participating in five of them for a year the author has created a pilot study that delves into a subculture of unbounded creativity

University Writing: Selves and Texts in Academic Societies Montserrat Castelló, Christiane Donahue, 2012-02-03 *University Writing Selves and Texts in Academic Societies* examines new trends in the different theoretical perspectives cognitive social and cultural and derived practices in the activity of writing in higher education These perspectives are analyzed on the basis of their conceptualization of the object

academic and scientific writing of the writers their identities attitudes and perspectives be it students teachers or researchers and of the derived instructional practices the ways in which the teaching learning situations may be organized The volume samples writing research traditions and perspectives both in Europe and the United States working on their situated nature and avoiding easy or superficial comparisons in order to enlarge our understanding of common problems and some emerging possibilities

Professionalizing Multimodal Composition Santosh Khadka, Shyam B. Pandey, 2023-06-15 Multimodal composition is becoming increasingly popular in university classrooms as faculty students and institutions come to recognize that old and new technologies have enabled and even demanded the use of more than one composing mode for communicating solving problems and keeping up with the latest discourse Professionalizing Multimodal Composition embraces and enacts multimodal composition in various writing courses and programs by exploring institutional programmatic and individual faculty initiatives for capacity building and human resource development across institutions Academic leaders scholars and faculty who have successfully designed and launched academic programs or faculty development initiatives discuss the theoretical and logistical questions considered in their design the outcomes they achieved and how others can emulate them This exchange of knowledge insight experiences and lessons learned among community members is critical for enabling or inspiring other programs departments and institutions to conceive design and launch academic programs or faculty development initiatives for their own faculty The larger goal of professionalizing is to work with teaching faculty to increase their interactional expertise with multimodal composition and this collection offers a set of models for how faculty can do that at their own institutions and in their own

capabilities and limitations The contributors highlight the responsibility of instructors to guide students in the consideration of their audience and ethical responsibility while also maintaining the ability to speak well Additionally they focus on the need for programmatic changes and a shift in institutional philosophy to close a possible digital divide and remain relevant in digital and global economies Embracing and advancing multimodal communication is essential to both higher education and students The contributors therefore call for the examination of how writing programs faculty and administrators are responding to change and how the many purposes writing serves can effectively converge within composition curricula
