Eleventh-Century Byzantium James Howard-Johnston, 2020-09-10 The history of Byzantium pivots around the eleventh century during which it reached its apogee in terms of power prestige and territorial extension only then to plunge into steep political decline following serious military defeats and extensive territorial losses The political economic and intellectual history of the period is reasonably well understood but not so what was happening in that crucial intermediary sphere the social order which both shaped and was shaped by contemporary ideas and brute economic developments This volume aims to deepen understanding of Byzantine society by examining material evidence for settlements and production in different regions and by sifting through the far from plentiful literary and documentary sources in order to track what was happening in town and country There is evidence of significant change the pattern of landownership continued to shift in favour of those with power and wealth but there was sustained and effective resistance from peasant villages Provincial towns prospered in what was an era of sustained economic growth and through newly emboldened local elites took a more active part in public affairs In the capital the middling classes comprising much of officialdom and leading traders gained in importance while the twin military and civilian elites were merging to form a single governing class However despite this social upheaval careful analysis of these various factors by a range of leading Byzantine historians and archaeologists leads to the overarching conclusion that it was not so much internal structural changes which contributed to the vertiginous decline suffered by Byzantium in the late eleventh century as the unprecedented combination of dangerous adversaries on different fronts in the east north and west **Proceedings of the International Conference on Applied Science and Technology on**

The Garden City Movement Up-To-Date Ewart Gladstone Culpin, 2015-03-05 This work was written and compiled by the then Secretary of the Garden Cities and Town Planning Association in 1913 It shows just how much the conception of the garden city had been broadened from Howard's original texts Indeed the Association's own name had been broadened to add the newly emergent practice and theory of town planning to the original focus Alongside the garden city recognition is now given to the burgeoning numbers of garden suburbs and garden villages Many examples of these are identified and briefly described including many which are small and now little known greatly adding to the interest of the publication Even the underlying arguments for such developments differ Alongside the more altruistic arguments in favour of reform there are now those which explicitly emphasise the need to ensure a healthy race to maintain the Empire

Non-Plan: Essays on Freedom, Participation and Change in Modern Architecture and Urbanism Jonathan Hughes, Simon Sadler, 2013-01-11 Non Plan explores ways of involving people in the design of their environments a goal which transgresses political categories of right and left Attempts to circumvent planning bureaucracy and architectural inertia have ranged from free market enterprise zones to self build housing and from squatting to sophisticated technologies of prefabrication Yet all have shared in a desire to let people shape the built environment they want to live and work in How can buildings better reflect the needs of their inhabitants How can cities better facilitate the work and recreation of their many populations Modernism had promised a functionalist approach to resolving the architectural needs of the twentieth century yet the design of cities and buildings often appears to confound the needs of those who use them their design and layout being highly regulated by restrictive legislation planning controls and bureaucracy Non Plan considers the theoretical and conceptual frameworks within which architecture and urbanism have
