Undesigning The Bath:

Undesigning the Bath Leonard Koren, 1996 **The Architecture of Bathing** Christie Pearson, 2020-10-06 A celebration of communal bathing swimming pools saunas beaches ritual baths sweat lodges and more viewed through the lens of architecture and landscape We enter the public pool the sauna or the beach with a heightened awareness of our bodies and the bodies of others The phenomenology of bathing opens all of our senses toward the physical world entwined with the social while the history of bathing is one of shared space in both natural and built environments In *The Architecture of Bathing* Christie Pearson offers a unique examination of communal bathing and its history from the perspective of architecture and landscape Engagingly written and richly illustrated with more than 260 illustrations many in color *The Architecture of Bathing* offers a celebration of spaces in which public and private sacred and profane ritual and habitual pure and impure nature and culture commingle Pearson takes a wide ranging view of her subject drawing on architecture art and literary works Each chapter is structured around an architectural typology and explores an accompanying theme for example tub sensuality river flow waterfall rejuvenation and banya immersion Offering examples introducing relevant theory and recounting personal experiences Pearson effortlessly combines a practitioner's zest with astonishing erudition As she examines these forms we see that they are inextricable from landscapes bodily practices and cultural production Looking more closely we experience architecture itself as an immersive material and social space embedded in the interdependent environmental and cultural fabric of our world **Thirteen Books** Leonard Koren, 2001 An author and book designer offers a candid look at his own creations *Bathing - the Body and Community Care* Julia Twigg, 2002-01-04 Community care lies at the intersection of day to day life and the public world of service provision Using the lens of one particular activity bathing this book explores what happens when the public world of professionals and service provision enters the lives of older and disabled people In doing so it addresses wider issues concerning the management of the body the meaning of carework and the significance of body care in the ordering of daily life *Bathing the Body and Community Care* provides an engaging text for students and will be of interest to a wide range of audiences both social science and health science students and nursing and allied professionals **The Art of the Bath** Susannah Marriott, 2004 For many people a soothing bath can solve or at least ease a huge amount of worries ills or complaints Its invigorating nature is used the world over to calm troubles or as a place to retreat to escape the hassles of everyday life This tranquil little book is split into two parts firstly looking at everything you could possibly need to make the perfect bath ranging from candles and incense oils and essential oils and towels to loofahs and body brushes music reading matter and drinks Part two concentrates on luxurious home bathing providing recipes tips and treats Scattered throughout are snippets of history lore and culture gathered from bathing traditions the world over plus evocative quotes and wonderful images to accentuate the wonderfully restorative quality of the bath *Critical by Design?* Claudia Mareis, Moritz Greiner-Petter, Michael Renner, 2022-02-03 In its constructive and speculative nature design has the

critical potential to reshape prevalent socio material realities At the same time design is inevitably normative if not often violent as it stabilises the past normalises the present and precludes just and sustainable futures The contributions rethink concepts of critique that influence the field of design question inherent blind spots of the discipline and expand understandings of what critical design practices could be With contributions from design theory practice and education art theory philosophy and informatics Critical by Design aims to question and unpack the ambivalent tensions between design and critique

Materials and Meaning in Architecture Nathaniel Coleman,2020-02-20 Interweaving architecture philosophy and cultural history Materials and Meaning in Architecture develops a rich and multi dimensional exploration of materials and materiality in an age when architectural practice seems otherwise preoccupied with image and visual representation Arguing that architecture is primarily experienced by the whole body rather than chiefly with the eyes this broad ranging study shows how the most engaging built works are as tactile as they are sensuous communicating directly with the bodily senses especially touch It explores the theme of material imagination and the power of establishing place identity in an architect s work to consider the enduring expressive possibilities of material use in architecture The book s chapters can be dipped into each individual chapter providing close readings of built works by selected modern masters Scarpa Zumthor Williams and Tsien insights into key texts and theories Ruskin Loos Bachelard or short cultural histories of materials wood brick concrete steel and glass And yet taken together the chapters build to a powerful book length argument about how meaning accrues to materials through time and about the need to reinsert the bodily experience of materiality into architectural design It is thus also in part a manifesto arguing for architecture to act as a bulwark against the tide of an increasingly depersonalised built environment With insights for a wide range of readers ranging from students through to researchers and professional designers Materials and Meaning in Architecture will cause theorists to rethink their assumptions and designers to see new potential for their projects

The Art of Setting Stones Marc Peter Keane,2002-09-01

Philosophical essays on the beauty and meaning of traditional Japanese gardens In Japanese gardens composition follows from placement of the first stone all elements and plantings become interconnected These eight essays on Kyoto gardens similarly begin with keen description and build into richly meditative excursions into art Buddhism nature and science Landscape architect Marc Keane shows how Japanese gardens are both a microcosm of the natural universe and a clear expression of our humanity mirroring how we think worship and organize our lives and communities Filled with passages of alluring beauty this is a truly transcendent book about experiencing Japanese design *Dwell* ,2006-06 At Dwell we re staging a minor revolution We think that it s possible to live in a house or apartment by a bold modern architect to own furniture and products that are exceptionally well designed and still be a regular human being We think that good design is an integral part of real life And that real life has been conspicuous by its absence in most design and architecture magazines
