Curious Aesthete Leonard Koren, 2020-12 A quirky memoir of the aesthete responsible for creating culture icons such as WET The Magazine of Gourmet Bathing and bringing the concept of wabi sabi into Western aesthetic discourse *The Spirit of Design* Stuart Walker, 2021-12-24 Imaginative design will be a crucial factor in enacting sustainability in people s daily lives Yet current design practice is trapped in consumerist cycles of innovation and production making it difficult to imagine how we might develop a more meaningful and sustainable rendition of material culture Through fundamental design research The Spirit of Design challenges a host of common assumptions about sustainability progress growth and globalization Walker s practice based explorations of localisation human meaning and functional objects demonstrate the imaginative potential of research through design and yield a compelling constructive and essentially hopeful direction for the future one that radically re imagines our material culture by meshing mass production with individuality products with place and utilitarian benefit with environmental responsibility In so doing the author explores How understandings of human meaning affect design and how design can better incorporate issues of personal meaning How mass production needs to become integrated with localised production and service provision How short lived electronic goods can be brought into a more sustainable design paradigm The changing role of the designer in a post consumerist world Taking a design centred approach a combination of creative propositional design practice reasoned argument and theoretical discussion the book will impel readers to investigate the nature of contemporary material culture and its relationship to both the natural environment and to deeper notions of human meaning [Your Stone Age Brain in the Screen Age](#) Richard E. Cytowic, 2024-10-01 An

award winning neurologist on the Stone Age roots of our screen addictions and what to do about them The human brain hasn t changed much since the Stone Age let alone in the mere thirty years of the Screen Age That s why according to neurologist Richard Cytowic who Oliver Sacks observed changed the way we think of the human brain our brains are so poorly equipped to resist the incursions of Big Tech They are programmed for the wildly different needs of a prehistoric world In *Your Stone Age Brain in the Screen Age* Cytowic explains exactly how this programming works from the brain s point of view What he reveals in this book shows why we are easily addicted to screen devices why young developing brains are particularly

vulnerable why we need silence and what we can do to push back In the engaging storytelling style of his popular TED Talk Cytowic draws an easily comprehensible picture of the Stone Age brain s workings the function of neurotransmitters like dopamine in basic instincts for survival such as desire and reward the role of comparison in emotion and emotion in competition and most significantly the orienting reflex one of the unconscious circuits that automatically focus shift and sustain attention Given this picture the nature of our susceptibility to digital devices becomes clear along with the possibility of how to break their spell Full of practical actions that we can start taking right away Your Stone Age Brain in the Screen Age offers compelling evidence that we can change the way we use technology resist its addictive power over us and take back the control we have lost
