Wanderlust A History Of Walking By Rebecca Solnit 2014 Paperback:

Born to Walk Dan Rubinstein, 2015-04-01 The case for getting back on our feet The humble act of putting one foot in front of the other transcends age geography culture and class and is one of the most economical and environmentally responsible modes of transit Yet with our modern fixation on speed this healthy pedestrian activity has been largely left behind At a personal and professional crossroads writer editor and obsessive walker Dan Rubinstein travelled throughout the U S U K and Canada to walk with people who saw the act not only as a form of transportation and recreation but also as a path to a better world There are no magic bullet solutions to modern epidemics like obesity anxiety alienation and climate change But what if there is a simple way to take a step in the right direction Combining fascinating reportage eye opening research and Rubinstein s own discoveries **Born to Walk** explores how far this ancient habit can take us how much repair is within range and guarantees that you ll never again take walking for granted

Wanderlust Rebecca Solnit, 2001-06-01 A passionate thought provoking exploration of walking as a political and cultural activity from the author of *Orwell s Roses* Drawing together many histories of anatomical evolution and city design of treadmills and labyrinths of walking clubs and sexual mores Rebecca Solnit creates a fascinating portrait of the range of possibilities presented by walking Arguing that the history of walking includes walking for pleasure as well as for political aesthetic and social meaning Solnit focuses on the walkers whose everyday and extreme acts have shaped our culture from philosophers to poets to mountaineers She profiles some of the most significant walkers in history and fiction from Wordsworth to Gary Snyder from Jane Austen s Elizabeth Bennet to Andre Breton s Nadja finding a profound relationship between walking and thinking and walking and culture Solnit argues for the necessity of preserving the time and space in which to walk in our ever more car dependent and accelerated world

Walking Histories, 1800-1914 Chad Bryant, Arthur Burns, Paul Readman, 2016-04-16 Few historians have written about walking despite

its obvious centrality to the human condition Focusing on the period 1800 1914 this book examines the practices and meanings of walking in the context of transformative modernity It boldly suggests that once historians place walking at the heart of their analyses exciting new perspectives on themes central to the long nineteenth century emerge Walking Histories 1800 1914 adopts a global perspective including contributions from specialists in the history and culture of Great Britain North America Australia Russia East Central Europe and South Asia Critically engaging with recent research the contributions within offer fresh insights for academic experts while remaining accessible to student readers This book will be essential reading for those interested in movement travel leisure urban history and environmental history *Making One's Way in the World* Martin Bell, 2020-02-28 The book draws on the evidence of landscape archaeology palaeoenvironmental studies ethnohistory and animal tracking to address the neglected topic of how we identify and interpret past patterns of movement in the landscape It challenges the pessimism of previous generations which regarded prehistoric routes such as hollow ways as generally undatable The premise is that archaeologists tend to focus on sites while neglecting the patterns of habitual movement that made them part of living landscapes Evidence of past movement is considered in a multi scalar way from the individual footprint to the long distance path including the traces created in vegetation by animal and human movement It is argued that routes may be perpetuated over long timescales creating landscape structures which influence the activities of subsequent generations In other instances radical changes of axes of communication and landscape structures provide evidence of upheaval and social change Palaeoenvironmental and ethnohistorical evidence from the American North West coast sets the scene with evidence for the effects of burning animal movement faeces deposition and transplantation which can create readable routes along which are favoured resources Evidence from European hunter gatherer sites hints at similar practices of niche construction on a range of spatial scales On a local scale footprints help to establish axes of movement the locations of lost settlements and activity areas Wood trackways likewise provide evidence of favoured patterns of movement and past settlement location Among early farming communities alignments of burial mounds enclosure entrances and other monuments indicate axes of communication From the middle Bronze Age in Europe there is more clearly defined evidence of trackways flanked by ditches and fields Landscape scale survey and excavation enables the dating of trackways using spatial relationships with dated features and many examples indicate long term continuity of routeways Where fields flank routeways a range of methods including scientific approaches provide dates Prehistorians have often assumed that Ridgeways provided the main axes of early movement but there is little evidence for their early origins and rather better evidence for early routes crossing topography and providing connections between different environmental zones The book concludes with a case study of the Weald of South East England which demonstrates that some axes of cross topographic movement used as droveways and generally considered as early medieval can be shown to be of prehistoric origin One reason that dryland routes have proved difficult to recognise is that insufficient attention has been paid to the

parts played by riverine and maritime longer distance communication It is argued that understanding the origins of the paths we use today contributes to appreciation of the distinctive qualities of landscapes Appreciation will help to bring about effective strategies for conservation of mutual benefit to people and wildlife by maintaining and enhancing corridors of connectivity between different landscape zones including fragmented nature reserves and valued places In these ways an understanding of past routeways can contribute to sustainable landscapes communities and quality of life

The Virginia Quarterly Review, 2017

Creative Ecologies Hélène Frichot, 2018-12-13 Architect and philosopher H l ne Frichot examines how the discipline of architecture is theorized and practiced at the periphery Eschewing a conventionally direct approach to architectural objects to iconic buildings and big name architects she instead explores the background of architectural practice to introduce the creative ecologies in which architecture exists only in relation to other objects and ideas Consisting of a series of philosophical encounters with architectural practice that are neither neatly located in one domain nor the other this book is concerned with other ways of doing architecture It examines architecture at the limits where it is muddled by alternative disciplinary influences whether art practice philosophy or literature Frichot meets a range of creative characters who work at the peripheries and who challenge the central assumptions of the discipline showing that there is no core of architecture there is rather architecture as a multiplicity of diverse concerns in engagement with local environments and worlds From an author well known in the disciplines of architecture and philosophy for her scholarship on Deleuze this is a radical accessible and highly original approach to design research deftly engaging with an array of current topics from the Anthropocene to affect theory new materialism to contemporary feminism
