War On Waste Can America Win Its Battle With Garbage:

War on Waste Louis Blumberg, Robert Gottlieb, 1989 Examines the debate on the environmental issue of garbage control

Fighting Toxics Barry National Toxics Campaign, 2013-04-16 Fighting Toxics is a step by step guide illustrating how to investigate the toxic hazards that may exist in your community how to determine the risks they pose to your health and how to launch an effective campaign to eliminate them

How McGruff and the Crying Indian Changed America Wendy Melillo, 2023-08-08 Pulitzer Prize nominated journalist Wendy Melillo authors the first book to explore the history of the Ad Council and the campaigns that brought public service announcements to the nation through the mass media How McGruff and the Crying Indian Changed America A History of Iconic Ad Council Campaigns details how public service advertising campaigns became part of our national conversation and changed us as a society The Ad Council began during World War II as a propaganda arm of President Roosevelt's administration to preserve its business interests Happily for the ad industry it was a double play the government got top notch work the industry got an insider relationship that proved useful when warding off regulation From Rosie the Riveter to Smokey Bear to McGruff the Crime Dog How McGruff and the Crying Indian Changed America explores the issues and campaigns that have been paramount to the nation's collective memory and looks at challenges facing public service campaigns in the current media environment

Recycling and the Politics of Urban Waste Matthew Gandy, 2014-06-03 The affluence of western society has given rise to unprecedented quantities of waste presenting one of the most intractable environmental problems for contemporary society This book examines recycling and municipal waste management in three major cities London New York and Hamburg A range of political and economic issues are examined to illustrate how any reduction in the size of the waste stream in order to achieve more equitable and environmentally sustainable patterns of resource use is incompatible with the current emphasis in the use of the market for environmental protection The case studies show how contrary to the hopes of many environmentalists and policy makers municipal waste management is moving steadily towards the profitable option of incineration with energy recovery rather than the recycling of materials or waste reduction at source The evidence suggests that the achievement of a more sustainable pattern of recycling and waste management policy would demand a fundamental change in public policy to give government a more active role in environmental protection

Whose Backyard, Whose Risk Michael B. Gerrard, 1996 In Whose Backyard Whose Risk environmental lawyer professor and commentator Michael B Gerrard tackles the thorny issue of how and where to dispose of hazardous and radioactive waste In Whose Backyard Whose Risk environmental lawyer professor and commentator Michael B Gerrard tackles the thorny issue of how and where to dispose of hazardous and radioactive waste Gerrard who has represented dozens of municipalities and community groups that have fought landfills and incinerators as well as companies seeking permits clearly and succinctly analyzes a problem that has generated a tremendous amount of political conflict emotional anguish and transaction costs He proposes a new system of waste disposal

that involves local control state responsibility and national allocation to deal comprehensively with multiple waste streams Gerrard draws on the literature of law economics political science and other disciplines to analyze the domestic and international origins of wastes and their disposal patterns Based on a study of the many failures and few successes of past siting efforts he identifies the mistaken assumptions and policy blunders that have helped doom siting efforts Gerrard first describes the different kinds of nonradioactive and radioactive wastes and how each is generated and disposed of He explains historical and current siting decisions and considers the effects of the current mechanisms for making those decisions including the hidden economics and psychology of the siting process A typology of permit rules reveals the divergence between what underlies most siting disputes and what environmental laws actually protect Gerrard then looks at proposals for dealing with the siting dilemma and examines the successes and failures of each He outlines a new alternative for facility siting that combines a political solution and a legal framework for implementation A hypothetical example of how a siting decision might be made in a particular case is presented in an epilogue

Asian and Latino Immigrants in a Restructuring Economy Marta López-Garza, 2002-06-01 Experiencing both the enormous benefits and the serious detriments of globalization and economic restructuring Southern California serves as a magnet for immigrants from many parts of the world This volume advances an emerging body of work that centers this region's future on the links between the two fastest growing racial groups in California Asians and Latinos and the economic and social mainstream of this important sector of the global economy The contributors to the anthology scholars and community leaders with social science urban planning and legal backgrounds provide a multi faceted analysis of gender class and race relations They also examine various forms of immigrant economic participation from low wage workers to entrepreneurs and capital investors Asian and Latino Immigrants in a Restructuring Economy documents the entrenchment of various immigrant communities in the socio political and economic fabric of United States society and these communities role in transforming the Los Angeles region

Reducing Toxics Robert Gottlieb, 2013-04-22 In Reducing Toxics leading experts address industry technology health and policy issues and explore the potential for pollution prevention at the industry and facility levels They consider both the regulatory and institutional settings of toxics reduction initiatives prescribe strategies for developing a prevention framework and apply these principles in analyzing industry case studies Among the topics considered are the evolution of and limits to current environmental policy incorporating prevention into production planning and decisionmaking do voluntary programs lead to industry greening or greenwashing case studies of the chemical aerosols radiator repair and electric vehicle industries opportunities for and barriers to pollution prevention Reducing Toxics offers an analytic framework for defining and understanding different approaches in the toxics area and describes the basis for a new policy and industrial decisionmaking construct

The Handbook of Geoscience Frank R. Spellman, Melissa L. Stoudt, 2013-02-14 Written in an engaging and highly readable style The Handbook of Geoscience is ideal for students administrators legal professionals non

scientific professionals and general readers with little or no science background This handbook is a user friendly overview of our physical biological and ecological environment one that offers up to date coverage of the major scientific fields that form the structure of geoscience Students who are enrolled in a geoscience course or one of its many subdisciplines will find this work an invaluable resource to support and supplement classroom instruction The emphasis is on readability with clear example driven explanations refined by more than 35 years of experience of instruction and student feedback

Smoke on the Water Dario Fazzi, 2023-10-31 The U S government military and industry once saw ocean incineration as the safest and most efficient way to dispose of hazardous chemical waste Beginning in the late 1960s toxic chemicals such as PCBs and other harmful industrial byproducts were taken out to sea to be destroyed in specially designed ships equipped with high temperature combustion chambers and smokestacks But public outcry arose after the environmental and health risks of ocean incineration were exposed and the practice was banned in the early 1990s *Smoke on the Water* traces the rise and fall of ocean incineration showing how a transnational environmental movement tested the limits of U S political and economic power Dario Fazzi examines the anti ocean incineration movement that emerged on both sides of the Atlantic arguing that it succeeded by merging local advocacy with international mobilization He emphasizes the role played at the grassroots level by women migrant workers and other underrepresented groups who were at greatest risk Environmental groups for their part gathered and shared evidence about the harms of at sea incineration building scientific consensus and influencing international debates *Smoke on the Water* tells the compelling story of a campaign against environmental degradation in which people from marginalized communities took on the might of the U S military industrial complex It offers new insights into the transnational dimensions of environmental regulation the significance of nonstate actors in international history and the making of environmental justice movements

Environmentalism Unbound Robert Gottlieb, 2002-08-02 A call for a broadened environmental movement that addresses issues of everyday life In *Environmentalism Unbound* Robert Gottlieb proposes a new strategy for social and environmental change that involves reframing and linking the movements for environmental justice and pollution prevention According to Gottlieb the environmental movement s narrow conception of environment has isolated it from vital issues of everyday life such as workplace safety healthy communities and food security that are often viewed separately as industrial community or agricultural concerns This fragmented approach prevents an awareness of how these issues are also environmental issues After tracing a history of environmental perspectives on land and resources city and countryside and work and industry Gottlieb focuses on three compelling examples of this new approach to social and environmental change The first involves a small industry dry cleaning and the debate over pollution prevention approaches the second involves a set of products janitorial cleaning supplies that may be hazardous to workers and the third explores the obstacles and opportunities presented by community or regional approaches to food supply in the face of an increasingly globalized food system
