Wassend Water Dalend Land Geschiedenis Van Nederland En Het Water:

Building on Water Salvatore Ciriaco, 2006-05 A fundamental natural resource water and its use not only reflect modes of production but also that complex interplay between resources and their exploitation and domination by various social agents who in their turn are inevitably influenced by the abundance or rarity of water supplies Focusing on scientific social and economic issues from the 16th to the 19th century the author one of Italy's leading historians in this field looks at the innumerable conflicts that arose over water resources and the environmental impact of projects intended to control them Venice and Holland are undoubtedly the two most fascinating cases of societies built on water with the conquest of vast expanses of marshland either inland or on the coast the Dutch polders or the Venetian lagoon not only stimulating agricultural production but also nurturing a deeply felt relationship between the local populations and the element of water itself The author rounds off his study by looking at the influence the hydraulic technology developed in Holland would have on many European countries France England and Germany in particular and at questions raised by contemporaries about the environmental impact of agricultural progress and its effects upon the social economic equilibria within the communities concerned *Well-being, Sustainability and Social Development* Harry Lintsen, Frank Veraart, Jan-Pieter Smits, John

Grin, 2018-06-14 This open access book examines more than two centuries of societal development using novel historical and statistical approaches It applies the well being monitor developed by Statistics Netherlands that has been endorsed by a significant part of the international statistical community It features The Netherlands as a case study which is an especially interesting example although it was one of the world's richest countries around 1850 extreme poverty and inequality were significant problems of well being at the time Monitors of 1850 1910 1970 and 2015 depict the changes in three dimensions of well being the quality of life here and now later and elsewhere The analysis of two centuries shows the solutions to the extreme poverty problem and the appearance of new sustainability problems especially in domestic and foreign ecological systems The study also reveals the importance of natural capital soil air water and subsoil resources showing their relation with the social structure of the here and now Treatment and trade of natural resources also impacted on the quality of life later and elsewhere Further the book illustrates the role of natural capital by dividing the capital into three types of raw materials and concomitant material flows bio raw materials mineral and fossil subsoil resources Additionally the analysis of the institutional context identifies the key roles of social groups in well being development The book ends with an assessment of the solutions and barriers offered by the historical anchoring of the well being and sustainability issues This unique analysis of well being and sustainability and its institutional analysis appeals to historians statisticians and policy makers

Op zoek naar de geschiedenis van het landschap Hans Renes, 2010 Oorspronkelijke natuur is in ons land zeer schaars Eigenlijk bestaat heel Nederland uit cultuurlandschap landschap dat door de mens grondig is aangepast aan de eigen behoeften Daar zijn eeuwen overheen gegaan en in ons huidige landschap zijn sporen uit verschillende tijden bewaard

gebleven Soms zijn die eenvoudig te herkennen door een goede waarnemer zoals hooggelegen oude dorpskernen in het vlakke westen een wiel naast een dijk een terp uitgestrekte heidevelden in Oost Nederland een jaagpad een tiendweg een oude es een motte Veel andere sporen zijn bijna onzichtbaar en vragen een geoefend oog Deel 6 in de Zoekreeks geeft een beschrijving van de verschillende cultuurlandschappen en van hun voorgeschiedenis Uitgebreid komt aan de orde welke bronnen en methodes er zijn om zelf op zoek te gaan naar de achtergronden van het historische landschap

A Living Landscape Stijn Arnoldussen, 2008 Today half the Netherlands is below sea level Because of this water management is of key importance when it comes to maintaining present day habitation of the Dutch low lands In prehistory however large parts of the Dutch landscape were highly dynamic due to ongoing fluvial sedimentation Vast deltaic areas with ceaseless river activity formed the backdrop against which prehistoric occupation took place Although such landscapes may seem inhospitable the often excellently preserved archaeological evidence indicates that people lived in these lowlands throughout prehistory This book describes why Bronze Age farmers were keen to settle here and how these prehistoric communities structured the landscape around their house sites at various scales Using a vast body of evidence from several large scale excavations in the Dutch river area the author reconstructs the changes in the cultural landscape over time Starting from the Middle Neolithic changing preferences for settlement site locations and changes in domestic architecture are traced in detail to the Iron Age However for proper understanding of the cultural landscape not only settlements but also graves and patterns of object deposition and their landscape characteristics are discussed By using evidence from over 50 major excavations yielding over 300 house plans this book contains by far the richest data set on Dutch Bronze Age settlements Most of these results have not previously been published in English making this book of over 500 pages a true academic treasure for an international audience The in depth presentation of Bronze Age settlement sites as well as the critical discussion of models and premises current in later prehistoric settlement archaeology have an important relevance stretching beyond the Dutch lowland areas on which it is based The wealth of high quality Dutch data is presented as a synthesized yet well annotated narrative that rises above mere site interpretation even more so due to its landscape scale focus Therefore this book is a must have for those interested in later prehistoric cultural landscapes and settlement archaeology
