Wasting Americas Future:

America's Future in Toxic Waste Management Bruce Piasecki, Bruce W. Piasecki, Gary A. Davis, 1987 A major contribution to the environmental policy debate this is the first book to examine the legal technical and planning initiatives employed in Europe to avoid land disposal of toxic waste Although largely ignored in the U S until now safer alternatives to land disposal exist in Europe By studying and implementing the best of these methods the authors argue the United States can begin to resolve its own toxic waste problem a problem that has reached crisis proportions *Harnessing America's Wasted Talent* Peter Smith, 2009-12-30 Praise for Harnessing America's Wasted Talent President Obama offered America and the world renewed hope for a better tomorrow With decades of experience in alternative forms of higher education Peter Smith grabs that optimistic spirit and seizes the moment to reveal to us the exciting age of Web based teaching and learning which is opening access to untold numbers of learners while harnessing the previously wasted talents of millions of people in America and billions around the world Those seeking insights a vision of the future and a chance to join this educational revolution should look forward to Harnessing America's Wasted Talent Curtis J Bonk professor Indiana University and author *The World Is Open How Web Technology Is Revolutionizing Education* Anyone who wants to understand where American higher education is headed should read Harnessing America's Wasted Talent Peter Smith's vision of the future of higher education is based on several decades of experience at the national state and international levels He brings a rare perspective that will interest students educators politicians and those American business leaders who are worried about the future of our workforce and the health of our democracy Charles Kolb president The Committee for Economic Development Harnessing America's Wasted Talent is a must read for those of us concerned about the increasing economic and education gaps in our country Peter Smith takes on an important American disconnect the need for an educated workforce and the fact that most working Americans lack a college degree Drawing upon his experience in higher education and politics Smith dissects the problem and presents a contemporary practical plan to enhance the learning capacity of our country Joseph B Moore president Lesley University **The Way We Really Are** Stephanie Coontz, 2008-08-06 Stephanie Coontz the author of *The Way We Never Were* now turns her attention to the mythology that surrounds today's family the demonizing of untraditional family forms and marriage and parenting issues She argues that while it's not crazy to miss the more hopeful economic trends of the 1950s and 1960s few would want to go back to the gender roles and race relations of those years Mothers are going to remain in the workforce family diversity is here to stay and the nuclear family can no longer handle all the responsibilities of elder care and childrearing Coontz gives a balanced account of how these changes affect families both positively and negatively but she rejects the notion that the new diversity is a sentence of doom Every family has distinctive resources and special vulnerabilities and there are ways to help each one build on its strengths and minimize its weaknesses The book provides a meticulously researched balanced account showing why a historically informed perspective on family life

can be as much help to people in sorting through family issues as going into therapy and much more help than listening to today's political debates

Furstenberg Jr., Anne Colby, 2002-05-30 The impact of long term longitudinal studies on the landscape of twentieth century social and behavioral science cannot be overstated The field of life course studies has grown exponentially since its inception in the 1950s and now influences methodologies as well as expectations for all academic research *Looking at Lives* offers an unprecedented insider s view into the intentions methods and findings of researchers engaged in some of the 20th century s landmark studies In this volume eminent American scholars many of them pioneers in longitudinal studies provide frank and illuminating insights into the difficulties and the unique scientific benefits of mounting studies that track people s lives over a long period of time *Looking at Lives* includes studies from a range of disciplines including psychology sociology and education which together cover a span of more than fifty years The contributors pay particular attention to the changing historical cultural and scientific context of their work as well as the theoretical and methodological changes that have occurred in their fields over decades What emerges is a clear indication of the often unexpected effects these studies have had on public policies and public opinion especially as they relate to such issues as the connection between poverty and criminal behavior or the consequences of teen age pregnancy and drug use for inner city youth For example David Weikart reveals how his long term research on preschool intervention projects begun in 1959 permitted him to show how surprisingly effective preschool education can be in improving the lives of disadvantaged children In another study John Laub and Robert Sampson build on findings from a groundbreaking study begun by Sheldon and Eleanor Glueck in the 1950s to reveal the myriad ways in which juvenile delinquency can predict criminal behavior in adults And Arland Thornton Ronald Freedman and William Axinn employ an intergenerational study of women and their children begun in 1962 to examine the substantial relaxation of social mores for family and individual behavior in the latter decades of the 20th century *Looking at Lives* is full

of striking testimony to the importance of long term longitudinal studies As a unique chronicle of the origins and development of longitudinal studies in America this collection will be an invaluable aid to 21st century investigators who seek to build on the successes and the experiences of the pioneers in life course studies *Confronting Poverty* Mark Robert Rank, 2020-12-16 *Confronting Poverty* is a text that introduces students to the dynamics of poverty and economic hardship in the U S It address four fundamental question 1 What is the nature prevalence and characteristics of poverty 2 Why does poverty exist 3 What are the effects and consequences of poverty upon individuals and the wider society and 4 How can poverty be reduced and alleviated In clear and engaging writing *Confronting Poverty* provides students with the most up to date research and thinking regarding American poverty and inequality It includes the many insights of the author s 30 years of writing and teaching on the subject It is designed to be used as either a primary or secondary text in a wide range of courses across academic disciplines In addition *Confronting Poverty* makes use of an innovative companion website developed by the author The focal point of the website is an interactive tool called the Poverty Risk Calculator that has been constructed with hundreds of thousands of case records extracted from the Panel Study of Income Dynamics PSID data set The website also includes a discussion guide on various aspects of poverty along with many other interactive links and activities short documentary films video interviews and lectures interactive data sources research briefs magazine and newspaper articles Each chapter includes an on line activity from the companion website for students to engage in resulting in a dynamic learning experience
