Water And Sanitation Services Public Policy And Management:

Water and Sanitation Services José Esteban Castro, Leo Heller, 2012 First Published in 2012 Routledge is an imprint of Taylor Francis an informa company

Water and Development Ronaldo Munck, Narathius Asingwire, Honor Fagan, Consolata Kabonesa, 2015-09-15 Water has always been a crucial catalyst for human development In Africa competition among different sectors for this scarce resource remains a critical challenge to water managers and decision makers Water and Development examines a range of issues from governance to solar distillation from gender to water pumps using a range of research methods from participant observation to GIS and SPSS data analysis Throughout however there is the unifying thread of developing a participatory and sustainable approach to water which recognises it as an essential public necessity The result is essential reading both for students of development and the environment and for NGOs and policy makers seeking a robust and transformational approach to water and development

The Human Rights to Water and Sanitation Léo Heller, 2022-05-12 This analysis of the human rights to safe drinking water and sanitation HRtWS uncovers why some groups around the world are still excluded from these rights L o Heller former United Nations Special Rapporteur on the human rights to water and sanitation draws on his own research in nine countries and reviews the theoretical legal and political issues involved The first part presents the origins of the HRtWS their legal and normative meanings and the debates surrounding them Part II discusses the drivers mainly external to the water and sanitation sector that shape public policies and explain why individuals and groups are included in or excluded from access to services In Part III public policies guided by the realization of HRtWS are addressed Part IV highlights populations and spheres of living that have been particularly neglected in efforts to promote access to services

Water Services Disputes in International Arbitration Xu Qian, 2020-05-12 Water Services Disputes in International Arbitration Reconsidering the Nexus of Investment Protection Environment and Human Rights by Xu Qian The argument that universal access to water is a human right is based on the fact that life on Earth cannot exist without water Yet the enormous cost of building and maintaining water service infrastructure purifying monitoring quality and providing sanitation services is beyond the means of many of the States most in need Foreign investment is thus mandated hence the often acrimonious tension manifest in investor State disputes over water rights This book offers the first in depth analysis of both international treaty norms and their interpretation by arbitral tribunals applicable to investment in water and sanitation services complete with thoroughly researched recommendations for those arbitral practitioners in the eye of the storm Like no previous study the book clearly reveals how to reconcile the economic and fundamental human interests arising from investment in water and sanitation services under the international investment regime Among many vital issues the author highlights the importance of the following legitimacy of a State s alleged regulatory objectives the suitability of the measures undertaken to achieve the objective and whether there are less restrictive means available legal framework and stability of the State applicable law changes in law and emergency

circumstances economic issues such as water pricing profit driven private companies reluctance to serve the poor investment tribunals generation of a regulatory and jurisprudential regime on water and sanitation services and determination of liability in relation to expropriation fair and equitable treatment and necessity Arguing that the current investment treaty and arbitral case law framework can regulate water and sanitation services if certain interpretations are favored by adjudicators the author offers viable sustainable and reasonable legal solutions A detailed annex presents cases decided before a variety of arbitral tribunals as well as relevant WTO and ICJ cases and reviews critical literature in the field The increasing number of cases involved with States regulatory measures shows that stakes around water services generate specific legal problems which are new in the world of international economic law As an incisive investigation of what has been called the incursion of investment tribunal decisions into the regulatory autonomy of host States this profound and innovative analysis provides a coherent and consistent method of review that provides greater certainty to both States and investors and deters abuse of power It will be welcomed by policymakers and stakeholders interested in the implications of globalization of water services for the capacity to adapt to climate change and will suggest ways to enable States to better manage vital water services even after privatization to foreign companies **Regenerative Sanitation** Thammarat Koottatep, Peter Emmanuel

Cookey, Chongrak Polprasert, 2019-02-15 This book proposes Regenerative Sanitation as the next era of sanitation management and attempts to provide a foundation for the study of sanitation on the premise that sanitation is a complex and dynamic system that comprises of social ecological technological and resource systems The preconception is that sanitation will deliver maximal benefits to society only when there exists a cyclical integration of the three subsystems to enable appropriate linkages between technological design and the delivery platform so as to achieve optimal and sustained sanitation solutions It also calls for the rethinking of sanitation to change the narrative towards more progressive trajectories such as resource recovery and reuse rather than just amelioration It explores the contributions to food security livelihood support urban regeneration rural development and even local economies A new paradigm theory and ten principles for ensuring practical and effective sanitation solutions and management is presented In addition is a unique conceptual framework applicable to both developed and developing countries and to all stages processes and cycles of delivering sanitation solutions that could critically evaluate analyse and provide credible adequate and appropriate sanitation solutions All of which culminates in a strategic and practical application platform called Sanitation 4.0 that advocates for total rejuvenation and comprehensive overhaul with eight key strategic considerations for the implementation Regenerative Sanitation A New Paradigm For Sanitation 4.0 is inter and trans disciplinary and encourages collaboration between engineers scientists technologists social scientists and others to provide effective and practical user centred solutions It includes relevant case studies examples exercise and future research recommendations It is written as both a textbook for researchers and students as well as a practitioners guide for policymakers and professionals The Berlin Reader Matthias Bernt, Britta Grell, Andrej

Holm,2014-04-09 By drawing together widely dispersed yet central writings the Berlin Reader is an essential resource for everyone interested in urban development in one of the most interesting and important metropolises in Europe It provides scholars as well as students journalists and visitors with an overview of the most central discussions on the tremendous changes Berlin experienced since the fall of the wall It covers a wide range of issues including inner city renewal housing and the local economy gentrification and other urban conflicts The book breaks ground in two dimensions first by offering also non German speakers an insight into the very controversial debates after reunification and second by highlighting the ambivalent consequences of Berlin s urban transformation in the past decades
