Advances in Heuristic Signal Processing and Applications Amitava Chatterjee, Hadi Nobahari, Patrick Siarry, 2013-06-05 There have been

significant developments in the design and application of algorithms for both one dimensional signal processing and multidimensional signal processing namely image and video processing with the recent focus changing from a step by step procedure of designing the algorithm first and following up with in depth analysis and performance improvement to instead applying heuristic based methods to solve signal processing problems In this book the contributing authors demonstrate both general purpose algorithms and those aimed at solving specialized application problems with a special emphasis on heuristic iterative optimization methods employing modern evolutionary and swarm intelligence based techniques The applications considered are in domains such as communications engineering estimation and tracking digital filter design wireless sensor networks bioelectric signal classification image denoising and image feature tracking The book presents interesting state of the art methodologies for solving real world problems and it is a suitable reference for researchers and engineers in the areas of heuristics and signal processing

Deep Learning for Multimedia Processing Applications Uzair Aslam Bhatti,Huang Mengxing,Jingbing Li,Sibghat Ullah Bazai,Muhammad Aamir,2024-02-21 Deep Learning for Multimedia Processing Applications is a comprehensive guide that explores the revolutionary impact of deep learning techniques in the field of multimedia processing Written for a wide range of readers from students to professionals this book offers a concise and accessible overview of the application of deep learning in various multimedia domains including image processing video analysis audio recognition and natural language processing Divided into two volumes Volume Two delves into advanced topics such as convolutional neural networks CNNs recurrent neural networks RNNs and generative adversarial networks GANs explaining their unique capabilities in multimedia tasks Readers will discover how deep learning techniques enable accurate and efficient image recognition object detection semantic segmentation and image synthesis The book also covers video analysis techniques including action recognition video captioning and video generation highlighting the role of deep learning in extracting meaningful information from videos Furthermore the book explores audio processing tasks such as speech recognition music classification and sound event detection using deep learning models It demonstrates how deep learning algorithms can effectively process audio data opening up new possibilities in multimedia applications Lastly the book explores the integration of deep learning with natural language processing techniques enabling systems to understand generate and interpret textual information in multimedia contexts Throughout the book practical examples code snippets and real world case studies are provided to help readers gain hands on experience in implementing deep learning solutions for multimedia processing Deep Learning for Multimedia Processing Applications is an essential resource for anyone interested in harnessing the power of deep learning to unlock the vast potential of multimedia data
