The User Experience Team of One Leah Buley, Joe Natoli, 2024 *Market and User Research Operations* Stephanie Marsh, 2025-08-03 Research Operations is a reasonably new field but one that offers businesses huge opportunities to produce more high quality customer insights by reducing the administrative toll on research departments freeing up resource to deliver more value With customers demanding more

personalization of experiences fully understanding the consumer and their experience of your brand or product has never been more important This in turn is increasing the demand for more higher quality customer insights and as a result research teams are under more pressure than ever However many companies don't yet fully understand how they can operationalize their research in order to scale consistent and robust research practices enabling their teams to create more impactful research outcomes that deliver the much needed value to key stakeholders This is a practical guide on what exactly research operations is and how it can benefit your research by streamlining your administration so the research team can focus on delivering more impactful insights with more frequency on time and to budget This guide takes mid career professionals through how you can reduce waste by increasing the capability of reusing past research and minimizing the potential for doing unnecessary research how to plan your research to ensure the best outcome and how to choose the best tools for your research and business needs It covers the incredibly practical from considerations of GDPR how to recruit participants and how to set up research projects so they run smoothly as well as providing insight into how AI can be used as part of the research process how to democratize research and how to adapt to changing needs and requirements

particularly disappointing since Agile and HCD should be mutually supportive In practice Agile teams often bypass HCD efforts in favor of finishing their goals and thinking they are doing well only to have their work product fail to meet the actual end user s needs At first the team will become indignant We followed the expert guidance of our Product Owner the Voice of the Customer they will say followed by but it met all of the Acceptance Criteria they should love it It s a failure of Agile that this type of sub optimal delivery happens so regularly and predictably The fact that team responses can be so accurately predicted in advance by those who ve seen this movie many times before point to a process failure or inefficiency that is widespread and desperately needs to be addressed Alternatively teams will invest too heavily in up front discovery efforts that slow down delivery to an unacceptable point often while also failing to capture research based findings in a way that matures the overall strategic product or portfolio understanding The cost of misfiring goes far beyond a bad delivery or an angry customer Decreased team morale drives poorer future performance cost turnover if left unchecked more cost and non productive blame sessions that lead to degraded faith in the Agile product development model itself This book identifies solutions based on successful methods of integrating HCD practices by phase into an ongoing agile delivery model from the discovery through implementation and evaluation including key success factors for an HCD Agile engagement approach critical points of delivery and strategies for integrating HCD into teams based on the existing design maturity of an organization or product team
