Creating Material Worlds Louisa Campbell, Adrian Maldonado, Elizabeth Pierce, Anthony Russell, 2016-05-07 Despite a growing literature on identity theory in the last two decades much of its current use in archaeology is still driven toward locating and dating static categories such as Phoenician Christian or native Previous studies have highlighted the various problems and challenges presented by identity with the overall effect of deconstructing it to insignificance As the humanities and social sciences turn to material culture archaeology provides a unique perspective on the interaction between people and things over the long term This volume argues that identity is worth studying not despite its slippery nature but because of it Identity can be seen as an emergent property of living in a material world an ongoing process of becoming which archaeologists are particularly well suited to study The geographic and temporal scale of the papers included is purposefully broad to demonstrate the variety of ways in which archaeology is redefining identity Research areas span from the Great Lakes to the Mediterranean with case studies from the Mesolithic to the contemporary world by emerging voices in the field The volume contains a critical review of theories of identity by the editors as well as a response and afterward by A Bernard Knapp

Danes in Wessex Ryan Lavelle, Simon Roffey, 2015-11-30 There have been many studies of the Scandinavians in Britain but this is the first collection of essays to be devoted solely to their engagement with Wessex New work on the early Middle Ages not least the excavations of mass graves associated with the Viking Age in Dorset and Oxford drew attention to the gaps in our understanding of the wider impact of Scandinavians in areas of Britain not traditionally associated with them Here a multidisciplinary and interdisciplinary approach to the problems of their study is presented While there may not have been

the same degree of impact discernible particularly in place names and archaeology as in those areas of Britain which had substantial influxes of Scandinavian settlers Wessex was a major theater of the Viking wars in the reigns of Alfred and thelred Unr d Two major topics the Viking wars and the Danish landowning elite figure strongly in this collection but are shown not to be the sole reasons for the presence of Danes or items associated with them in Wessex Multidisciplinary approaches evoke Vikings and Danes not just through the written record but through their impact on real and imaginary landscapes and via the objects they owned or produced The papers raise wider questions too such as when did aggressive Vikings morph into more acceptable Danes and what issues of identity were there for natives and incomers in a province whose founders were believed to have also come from North Sea areas if not from parts of Denmark itself Readers can continue for themselves aspects of these broader debates that will be stimulated by this fascinating and significant series of studies by both established scholars and new researchers
