The Visual Toolbox 60 Lessons For Stronger Photographs Voices That Matter:

The Visual Toolbox David duChemin, 2015-03-20 Simply having a certain camera or lens isn't going to make you a better photographer. So what will? Understanding your camera. Thinking differently. Studying photographs and knowing what they provoke in you and why. Giving the craft time to grow. Looking to painters, designers, and others who work in two dimensions and learning from them. Relentlessly looking for light, lines, and moments. Making photographs, thousands and thousands of photographs. There's no magic bullet to achieving success, but in these pages you will learn the value of studying, practice, and remembering that your most important assets as an artist are imagination, passion, patience, receptivity, curiosity, and a dogged refusal to follow the rules. THE VISUAL TOOLBOX is photographer David duChemin's curriculum for learning not just how to use a camera but how to make stronger photographs. He has developed 60 lessons, each one a stepping stone to becoming more proficient with the tools of this art and the means to create deeper visual experiences with your images. David introduces you to the technical side of the craft but quickly moves on to composition, the creative process, and the principles that have always been responsible for making great photographs. He shows you these principles and invites you to play with them, turn them on their heads, and try a different approach to create beautiful, compelling images with your camera. Features action-oriented micro-chapters designed to improve your photography immediately. Includes explanations of 60 concepts with an assignment for nearly every chapter. Covers such topics as balance, using negative space, exploring color, contrast, waiting for the moment, learning to incorporate mood and motion, and much more.

Photographically Speaking David duChemin, 2011-10-11 When looking at a photograph too often a conversation starts and unfortunately ends with a statement such as "I like it." The logical next question, "Why?" often goes unasked and unanswered. As photographers, we frequently have difficulty speaking about images because frankly we don't know how to think about them. And if we don't know how to think about a photograph and its visual language, how an image is constructed, how it works, and why it works, then when we're behind the camera, are we really making images that best communicate our vision, our original intent? Vision is crucial, as it is not the ultimate goal of photography; expression is the goal. And to best express ourselves, it is necessary to learn and use the grammar and vocabulary of the visual language. Photographically Speaking is about learning photography's visual language to better speak to why and how a photograph succeeds and in turn to consciously use that visual language in the creation of our own photographs, making us stronger photographers who are able to fully express and communicate our vision. By breaking up the visual language into two main components, elements and decisions, it makes up its vocabulary and decisions are its grammar. David duChemin transforms what has traditionally been esoteric and difficult subject matter into an accessible and practical discussion that photographers can immediately use to improve their craft. Elements are the words of the image: what we place within the frame, lines, curves, light, color, contrast. Decisions are the choices we make in assembling those elements to best express and communicate our vision: the use of framing, perspective, point of view, balance, focus, exposure. All content within

the frame has meaning and duChemin establishes that photographers must consciously and deliberately choose the elements that go within their frame and make the decisions about how that frame is constructed and presented In the second half of the book duChemin applies this methodology to his own craft as he explores the visual language in 20 of his own images discussing how the intentional choices of elements and decisions that went into their creation contribute to their success

Los Angeles Magazine, 2006-02 Los Angeles magazine is a regional magazine of national stature Our combination of award winning feature writing investigative reporting service journalism and design covers the people lifestyle culture entertainment fashion art and architecture and news that define Southern California Started in the spring of 1961 Los Angeles magazine has been addressing the needs and interests of our region for 48 years The magazine continues to be the definitive resource for an affluent population that is intensely interested in a lifestyle that is uniquely Southern Californian

Vision & Voice David duChemin, 2010-07-12 What if your image could only communicate one thing one major idea overarching theme or driving emotion If you identified this you d discover your vision for that image the internal invisible guiding principle that directs both how you capture the image and how you develop it in the digital darkroom Without vision you likely find yourself flailing both behind the camera and in front of the computer indiscriminately shooting and arbitrarily moving sliders in hopes of stumbling upon something great every once in a while With vision you bring direction and intention to both the creation and development of all your images Vision Voice Refining Your Vision in Adobe Photoshop Lightroom is about identifying your vision and using Lightroom s Develop module to give voice that outward expression to your vision Photographer David duChemin begins with the fundamentals of a vision driven workflow where he discusses everything from vision and style to the importance of mood and color to the crucial role of histograms and of getting the best possible digital negative to work with After demonstrating how the Develop module s tools affect the aesthetics of your image duChemin then offers a straightforward approach to developing your images in accordance with your own personal vision identify your intention minimize the distractions maximize the mood and draw the viewer s eye all while leaving room for play and serendipity Finally duChemin applies this approach to 20 of his photographs as he takes you into his own digital darkroom and beginning with the original RAW file works step by step through the development of the final image

Within the Frame David duChemin, 2009-05-01 Within the Frame is a book about finding and expressing your photographic vision specifically where people places and cultures are concerned A personal book full of real world wisdom and incredible images author David duChemin of pixelatedimage com shows you both the how and the why of finding chasing and expressing your vision with a camera to your eye Vision leads to passion and passion is a cornerstone of great photography With it photographs draw the eye in and create an emotional experience Without it a photograph is often not worth and can t capture a viewer s attention Both instructional and inspirational Within the Frame helps you on your photographic journey to make better images of the places and people you love whether they are around the world or in your

own backyard duChemin covers how to tell stories and the technology and tools we have at our disposal in order to tell those narratives Most importantly he stresses the crucial theme of vision when it comes to photographing people places and cultures and he helps you cultivate and find your own vision and then fit it within the frame **Visual Poetry** Chris Orwig,2009-08-21 A great photograph has the potential to transcend verbal and written language But how do you create these photographs It s not the how that s important but the who and the what Who you are as a person has a direct impact on what you capture as a photographer Whether you are an amateur or professional architect or acupuncturist physician or photographer this guide provides inspiration simple techniques and assignments to boost your creative process and improve your digital images using natural light without additional gear Chris Orwig s insights to reduce and simplify participate rather than critique and capture a story have made him an immensely popular workshop speaker and faculty member at the prestigious Brooks Institute His engaging stories presented as lessons follow his classroom approach and highlight what students say is his contagious passion for life In this accessible and beautifully illustrated four color guide you will Discover visual poetry in the creative process Use less to say more with your subject matter Learn to see light color shape and expression Understand what gear is essential Create compelling portraits Make lasting memories of your family and kids Capture the outdoors and adventure Begin the transition from amateur to professional Chris also includes exclusive interviews with such photographers as Steve McCurry Chris Rainier John Sexton Rodney Smith Joyce Tenneson John Paul Caponigro Marc Riboud and Pete Turner Share your work with the author and other readers at www.flickr.com/groups/visualpoet and visit the Web site www.visualpoet.com Speaking with Photographs Peter Stanley,2016-11-06 Through 67 hands on lessons this book guides photography educators and students through the process of making stunning images and using these skills to tell stories that engage and inspire an audience The reader will gain a strong foundation in DOCUMENTARY PHOTOGRAPHY and a joy for pursuing and sharing powerful photo stories To understand the path ahead a brief distinction is made between photography photojournalism and documentary photography Seven COMPOSITION tricks are explored through forty activities to learn how to make meaningful photographs that hold the viewer s eye This builds through activities to help photographers step out of their comfort zone to capture engaging SUBJECTS in the surrounding community With skills and practice in place the final focus is the PHOTO ESSAY which includes eight guided major projects that encourage the photographer to connect with the subject through research and multiple visits Beginners and advanced photographers with any camera can enjoy and learn from each lesson that has been inspired by some of the world s most notable photographers including Henri Cartier Bresson Vivian Meier William Albert Allard and Paul Nicklen PETER STANLEY is an award winning photographer with publications in National Geographic BBC The Guardian and The Telegraph He was raised in Tanzania and has lived in Kenya Papua New Guinea Thailand USA and Romania He studied wildlife ecology and conservation and has been a biology teacher for 15 years This book is a culmination of his Masters of the Arts in

The Heart of the Photograph David Duchemin, 2020 Photographers often look at an image one they've either already created or are in the process of making and ask themselves a simple question Is this a good photograph It's an understandable question but the truth is that it's profoundly unhelpful How are you supposed to answer that What does good even mean What if you were equipped to ask better more specific questions of your work so that you could answer them more directly and in doing so bring more specific action and intention to the act of creating photographs What if asking the right questions allowed you to establish a more helpful and pragmatic approach to your image making In The Heart of the Photograph photographer and author David duChemin helps you learn to ask and find your own answers to better questions of your work in order to craft more successful photographs Photographs that express and connect photographs that are strong and above all yours From the big picture questions What do I want this image to accomplish to the more detail oriented questions that help you get there What is the light doing Where do the lines lead David walks you through his own questions and process so that you can establish your own Along the way there are discussions of the building blocks from which compelling photographs are made such as gesture balance scale harmony perspective story memory symbolism and much more The Heart of the Photograph is not a theoretical book It is an immensely practical and truly useful book that empowers you to ask better more helpful questions of you and your work so that you can produce images that fulfill your vision and intention for them
