Augustine and Time John Doody,Sean Hannan,Kim Paffenroth,2021-05-25 This collection examines the topic of time in the life and works of Augustine of Hippo Adopting a global perspective on time as a philosophical and theological problem the volume includes reflections on the meaning of history the mortality of human bodies and the relationship between temporal experience and linguistic expression As Augustine himself once observed time is both familiar and surprisingly strange Everyone's days are structured by temporal rhythms and routines from watching the clock to whiling away the hours at work Few of us however take the time to sit down and figure out whether time is real or not or how it is we are able to hold our past present and future thoughts together in a straight line so that we can recite a prayer or sing a song Divided into five sections the essays collected here highlight the ongoing relevance of Augustine's work even in settings quite distinct from his own era and context The first three sections organized around the themes of interpretation language and gendered embodiment engage directly with Augustine's own writings from the Confessions to the City of God and beyond The final two sections meanwhile explore the afterlife of the Augustinian approach in conversation with medieval Islamic and Christian thinkers like Avicenna and Aquinas as well as a broad range of Buddhist figures like Dharmakirti and Vasubandhu What binds all of these diverse chapters together is the underlying sense that regardless of the century or the tradition in which we find ourselves there is something about the puzzle of temporality that refuses to go away Time as Augustine knew demands our attention This was true for him in late ancient North Africa It was also true for Buddhist thinkers in South and East Asia And it remains just as true for humankind in the twenty first century as people around the globe continue to grapple with the reality of time and the challenges of living in a world that always seems to be speeding up rather than slowing down

Mind As Action James V. Wertsch, 1998-01-08 Contemporary social problems typically involve many complex interrelated dimensions psychological cultural and institutional among others But today the social sciences have fragmented into isolated disciplines lacking a common language and analyses of social problems have polarized into approaches that focus on an individual's mental functioning over social settings or vice versa In Mind as Action James V Wertsch argues that current approaches to social issues have been blinded by the narrow confines of increasing specialization in the social sciences In response to this conceptual blindness he proposes a method of sociocultural analysis that connects the various perspectives of the social sciences in an integrated nonreductive fashion Wertsch maintains that we can use mediated action which he defines as the irreducible tension between active agents and cultural tools as a productive method of explicating the complicated relationships between human action and its manifold cultural institutional and historical contexts Drawing on the ideas of Lev Vygotsky Mikhail Bakhtin and Kenneth Burke as well as research from various fields this book traces the implications of mediated action for a sociocultural analysis of the mind as well as for some of today's most pressing social issues Wertsch's investigation of forms of mediated action such as stereotypes and historical narratives provide valuable new insights into issues such as the mastery appropriation and resistance of culture By providing an analytic unit that has the possibility of operating at the crossroads of various disciplines Mind as Action will be important reading for academics students and researchers in psychology linguistics cognitive science sociology literary analysis and philosophy

Images in Mind Deborah Steiner, 2001 In archaic and classical Greece statues played a constant role in people's religious political economic aesthetic and mental lives Evidence of many kinds demonstrates that ancient Greeks thought about and interacted with statues in ways very different from our own This book recovers ancient thinking about statues by approaching them through contemporary literary sources It not only shows that ancient viewers conceived of images as more operative than aesthetic but additionally reveals how poets and philosophers found in sculpture a practice good to think with Deborah Tarn Steiner

considers how Greek authors used images to ponder the relation of a copy to an original and of external appearance to inner reality For these writers a sculpture could straddle life and death encode desire or occasion reflection on their own act of producing a text Many of the same sources also reveal how thinking about statues was reflected in the objects everyday treatment Viewing representations of gods and heroes as vessels hosting a living force worshippers ritually washed clothed and fed them in order to elicit the numinous presence within By reading the plastic and verbal sources together this book offers new insights into classical texts while illuminating the practices surrounding the design manufacture and deployment of ancient images Its argument that images are properly objects of cultural and social rather than purely aesthetic study will attract art historians cultural historians and anthropologists as well as classicists
