Colonial Violence and Monuments in Global History Cynthia C. Prescott, Janne Lahti, 2023-08-29 This book tackles the historical relationship between colonial violence and monuments in Africa Europe the Indian subcontinent North America and Australia In this volume the authors ask similar questions about monuments in each location and answer them following a parallel structure that encourages comparison highlighting common themes The chapters track the contested histories of monuments scrutinizing their narrative power and examining the violent events behind them It is both about the history of monuments and the histories the monuments are meant to commemorate It is interested in this nuanced relationship between violence monuments memory and colonial legacies the ways different facets of colonial violence conquest resistance massacres genocides internments and injustices have been commemorated or haven't been how they live in the present and how pertinent they are in the present to different peoples Legacies of colonial violence and continued reinterpretations of the past and its meanings remain very much ongoing They are still very much unsettled questions in large parts of the world *Colonial Violence and Monuments in Global History* will be essential reading for students scholars and researchers of

Family History and Historians in Australia and New Zealand Malcolm Allbrook, Sophie

Scott-Brown, 2021-06-27 Since the turn of the twenty first century family history is the place where two great oceans of research are meeting family historians outside the academy with traditionally trained often university employed historians This collection is both a testament to dialogue and an analysis of the dynamics of recent family history that derives from the confluence of professional historians with family historians their common causes and conversations It brings together leading and emerging Australian and New Zealand scholars to consider the relationship between family history and the discipline of history and the potential of family history to extend the scope of historical inquiry even to revitalise the discipline In Anglo Western culture the roots of the discipline s professionalisation lay in efforts to reconstruct history as objective knowledge to extend its subject matter and to enlarge the scale of historical enquiry Family history almost by definition is often inescapably personal and localised How then have historians responded to this resurgence of interest in the personal and the local and how has it influenced the thought and practice of historical enquiry

Anzac, The Unauthorised Biography Carolyn Holbrook, 2014-09-01 Raise a glass for an Anzac Run for an Anzac Camp under the stars for an Anzac Is there anything Australians won t do to keep the Anzac legend at the centre of our national story But standing firm on the other side of the Anzac enthusiasts is a chorus of critics claiming that the appetite for Anzac is militarising our history and indoctrinating our children So how are we to make sense of this struggle over how we remember the Great War Anzac the Unauthorised

Biography cuts through the clamour to provide a much needed historical perspective on the battle over Anzac It traces how since 1915 Australia s memory of the Great War has declined and surged reflecting the varied and complex history of the Australian nation itself Most importantly it asks why so many Australians persist with the fiction that the nation was born on 25 April 1915 **The Routledge Research Companion to Heritage and Identity** Peter Howard,2016-03-16 Heritage represents the meanings and representations conveyed in the present day upon artifacts landscapes mythologies memories and traditions from the past It is a key element in the shaping of identities particularly in the context of increasingly multicultural societies This Research Companion brings together an international team of authors to discuss the concepts ideas and practices that inform the entwining of heritage and identity They have assembled a wide geographical range of examples and interpret them through a number of disciplinary lenses that include geography history museum and heritage studies archaeology art history history anthropology and media studies This outstanding companion offers scholars and graduate students a thoroughly up to date guide to current thinking and a comprehensive reference to this growing field

The imperial Commonwealth Wm. Matthew Kennedy,2023-07-25 From the late 1800s to the early 1900s Australian settler colonists mobilised their unique settler experiences to develop their own vision of what empire was and could be Reinterpreting their histories and attempting to divine their futures with a much heavier concentration on racialized visions of humanity white Australian settlers came to believe that their whiteness as well as their Britishness qualified them for an equal voice in the running of Britain s imperial project Through asserting their case many soon claimed that as newly minted citizens of a progressive and exemplary Australian Commonwealth white settlers such as themselves were actually better suited to the modern task of empire Such a settler political cosmology with empire at its center ultimately led Australians to claim an empire of their own in the Pacific Islands complete with its own unique imperial governmentality *Teaching the Discipline of History in an Age of Standards* Jennifer Clark,Adele Nye,2018-06-08 This book discusses the discipline standards of History in Australian universities in order to help historians understand the Threshold Learning Outcomes and to assist in their practical application It is divided into two sections The first offers a scholarly exploration of contemporary issues in history teaching while the second section discusses each of the Threshold Learning Outcomes and provides real world examples of quality pedagogical practice Although the book focuses on the discipline of history in Australia other subjects and other countries are facing the same dilemmas As such it includes chapters that address the international context and bring an international perspective to the engagement with discipline standards The innovation and leadership of this scholarly community represents a new stage in the transformation and renewal of history teaching **The Oxford Handbook of Public History** ,2017-09-20 The Oxford Handbook of Public History introduces the major debates within public history the methods and sources that comprise a public historian s tool kit and exemplary examples of practice It views public history as a dynamic process combining historical research and a wide range of work with and for the public

informed by a conceptual context The editors acknowledge the imprecision bedeviling attempts to define public history and use this book as an opportunity to shape the field by taking a deliberately broad view They include professional historians who work outside the academy in a range of institutions and sites and those who are politically committed to communicating history to the wide range of audiences This volume provides the information and inspiration needed by a practitioner to succeed in the wide range of workplaces that characterizes public history today for university teachers of public history to assist their students and for working public historians to keep up to date with recent research This handbook locates public history as a professional practice within an intellectual framework that is increasingly transnational technological and democratic While the nation state remains the primary means of identification increased mobility and the digital revolution have occasioned a much broader outlook and awareness of the world beyond national borders It addresses squarely the tech savvy media literate citizens of the world the digital natives of the twenty first century in a way that recognizes the revolution in shared authority that has swept museum work oral history and much of public history practice This volume also provides both currently practicing historians and those entering the field a map for understanding the historical landscape of the future not just to the historiographical debates of the academy but also the boom in commemoration and history outside the academy evident in many countries since the 1990s which now constitutes the historical culture in each country Public historians need to understand both contexts and to negotiate their implications for questions of historical authority and the public historian's work The boom in popular history is characterized by a significant increase in both making and consuming history in a range of historical activities such as genealogy family history and popular collecting cultural tourism historic sites and memorial museums increased memorialization both formal and informal from roadside memorials to state funded shrines and memorial Internet sites increased publication of historical novels biographies and movies and TV series set in the past Much of this as well as a vast array of new community cultural projects has been facilitated by the digital technologies that have increased the accessibility of historical information the democratization of practice and the demand for sharing authority

The Fuss that Never Ended Deborah Gare, 2003 It is time to reassess the work of Geoffrey Blainey and consider his role in Australian history politics and public life Geoffrey Blainey has steered Australian history into the nation's conversation No one would dispute that he is a courageous public intellectual a writer of rare grace and a master storyteller And he has indeed provoked a rare fuss both public and professional with some of his comments on Asian immigration and Aboriginal land rights Blainey has challenged the academic history profession not only with his ideas but also by his practice A brilliant student he looked set for Oxford but chose instead the austere west coast of Tasmania for his postgraduate research For the next decade he earned a living with his pen And instead of political history in the traditional academic mould he wrote corporate histories that dispensed with footnotes Always probing and speculative Blainey has dislodged many of the keystones in our understandings of Australia's past He was one of the first to write about the expansive social

history of this land before 1788 he questioned whether Botany Bay was founded primarily as a convict colony he argued that the Eureka uprising had economic rather than political causes and he identified sport as a neglected key to the Australian character His controversial views earned such newspaper headlines as Brave Man Set Upon by Thugs for Telling Truth In The Fuss That Never Ended a lively and distinguished assembly of fellow historians and of various ages interests and political stances take a fresh look at Blainey's remarkable and sometimes controversial career **History, Ethics, and the Recognition of the Other** Anton Froeyman, 2015-09-25 This book introduces a new way of looking at the writing of history Rather than as the production of knowledge or the telling of stories it sees writing history as an ethical existential and emotional engagement with the people from the past The conceptual and philosophical basis for this view is provided by the philosophy of Emmanuel Levinas In the first part the view is presented and contrasted with other competing views such as those of Hans Georg Gadamer and Michel Foucault In the second part the view is argued for most importantly by an in depth discussion of one specific tradition of history writing microhistory and a series of close readings of several classical works from the history of historiography The third part finally explores some of the methodological consequences of this view and applies it to a non academic way of dealing with the past namely historical performance practice in music The book features a foreword by Frank Ankersmit History, Historians and the Immigration Debate Eureka Henrich, Julian M.

Simpson, 2018-10-13 This book is a response to the binary thinking and misuse of history that characterize contemporary immigration debates Subverting the traditional injunction directed at migrants to go back to where they came from it highlights the importance of the past to contemporary discussions around migration It argues that historians have a significant contribution to make in this respect and shows how this can be done with chapters from scholars in Asia Europe Australasia and North America Through their work on global transnational and national histories of migration an alternative view emerges one that complicates our understanding of 21st century migration and reasserts movement as a central dimension of the human condition History Historians and the Immigration Debate makes the case for historians to assert themselves more confidently as expert commentators offering a reflection on how we write migration history today and the forms it might take in the future The Oxford History of Historical Writing: 1800-1945 Daniel R. Woolf, Andrew

Feldherr, Grant Hardy, Ian Hesketh, 2011 A chronological scholarly survey of the history of historical writing in five volumes Each volume covers a particular period of time from the beginning of writing to the present day and from all over the world
