simple yet spellbinding lens to better understand the complex issue of climate change At its core climate change is an issue few truly understand in large part due to its dizzying array of scientific economic cultural social and political variables Using both keen humor and memorable anecdotes while weaving respected scientific studies along the way Mike Gunter Jr transports the reader to five famous ecodestinations from the Galapagos Islands to the Great Barrier Reef revealing firsthand the increasing threats of climate change Part travelogue part current events expos with a healthy dose of history ecology and politics these tales of ecoadventure tackle such obstacles head on while fleshing out much needed personal context to perhaps society s greatest threat of all

**The Face of the Earth** J. Donald Hughes, 2015-05-11 Although the organizing principle of virtually every world history text is development the editor of this volume maintains that this traditional approach fails to address the issue of sustainability By adopting the ecological process as their major theme the authors show how the process of human interaction with the natural environment unfolded in the past and offer perspective on the ecological crises in our world at the beginning of the 21st century Topics range from broad regional studies that examine important aspects of the global environment that affect nations to a study of the widespread influence of one important individual on his nation and beyond The authors take different approaches but all share the conviction that world history must take ecological process seriously and they all recognize the ways in which the living and non living systems of the earth have influenced the course of human affairs
