Racializing Humankind: Interdisciplinary Perspectives on Practices of 'Race' and Racism Julian T. D.

Gärtner, Malin Wilckens, 2022-02-14 Debates on historical and contemporary racism have recently become the subject of increasing public interest The Black Lives Matter movement as well as the Covid 19 pandemic have underlined the importance and urgent necessity of examining racism in society from a multidisciplinary angle The many facets of racism in the past and present also challenge the way we deal with history historical culture in a globalized world Rather than focusing on the history of ideas and its discursive development this volume will focus on the practices of actors It examines how and which practices especially practices of comparing are constitutive in the construction of race and manifestations of racism This edited volume brings together interdisciplinary contributions from history sociology political science American studies literary studies and media studies An important focus lies on the social asymmetries created by racialization including inequalities and violence The chapters foreground historical and contemporary practices of racism and discuss their appearance in different epochs and locations

Practices of Comparing Angelika Eppler, Walter Erhart, Johannes Grave, 2020-06-22 Practices of comparing shape how we perceive organize and change the world Supposedly innocent practices of comparing play a decisive role in forming categories boundaries and hierarchies but they can also give an impetus to question and change such structures Like almost no other human practice comparing pervades all social political economic and cultural spheres This volume outlines the program of a new research agenda that places comparative practices at the center of an interdisciplinary exploration Its contributions combine case studies with overarching systematic considerations They show what insights can be gained and which further questions arise when one makes a seemingly trivial practice comparing the subject of in depth research

Critique of insufficient reason Slavko Kacunko, 2021-06-02 After Taste is an inquiry into a field of study dedicated to the reconsideration reconstruction and rehabilitation of the concept of Taste Taste is the category whose systematic historical and actual dimensions have traditionally been located in a variety of disciplines The actuality and potential of the study is based on a variety of collected facts from readings and experiences which materialize in the following features One concept figurative Taste two thinking traditions analytic and synthetic continental and three interrelated dimensions systematic historic and actual are presented in three volumes As such the study presents a salient comprehensive companion for wider readership of humanities approaching conceptions of Taste for the first time Moreover After Taste is intended for anyone who hopes to make a further contribution to the subject Since its appearance and apparently short triumph some 250 years ago the concept of non literary Taste remained the linchpin of aesthetic theory and practice but also a category outreaching aesthetics Taste as the personal unity of the production theory and criticism of art and literature which was still largely taken as a given in the eighteenth century has meanwhile given way to a highly differentiated art world in which aesthetic discourse is placed in such a way that it can seemingly no longer have a conceptual or linguistic effect on general opinion making The critical role of Taste judges ratings and rankings in the feuilleton politics and social media on the one hand and the responding search for new canons on the other have had a huge impact on the academic and popular discourse today However Taste s impact on society is in fact all encompassing and yet without getting even close to the magnetic North of the academic compass After Taste fills the gaps of systematic research by a comprehensive tracing of the emergence of the doctrines discourses and disciplinary dimensions of Taste up to the peak of its systematic and historical trajectory in the eighteenth century and onwards into the present day The guiding goal is a post disciplinary rehabilitation of the contested category as a preparation for its productive usage in emerging academic and popular contexts Three intertwined research hypotheses form the guiding goal of an overall study of the agencies of Taste its institutionalizations and expert cultures The 1 first part provides a missing systematic perspective on the concept of Taste as a key factor for understanding the human faculties value theories and practices of valuating The 2 second part traces the events at the peak of Taste s systematic and historical trajectories up until the late eighteenth century and verifies the historiographical hypothesis about the instrumentality of Taste for the production reception and distribution of culture The 3 third part reconstructs the major moments in which the contested concept of Taste experiences its post disciplinary rehabilitation in preparation for its future

productive usage in the academic and popular discourses and practices It shows how the category of Taste became the foundation legitimation and the catalyst for the emerging division of labour faculties and disciplines confirming the hypothesis of the immense impact and actuality of Taste in the contemporary world **Vergleichendes Erkennen** Michael Eggers, 2016 English summary For the first time the history of scholarly methods of comparison is presented in an interdisciplinary monograph which then tracks the development of those emerging intellectually and sociologically comparable disciplines above all comparative literature on the basis of their roots and contexts at the beginning of the 19th century The most important outlines for the genealogy of comparison are presented in this work and their recurrence in literary sources is demonstrated throughout the 19th century From the philosophy of the Enlightenment and rationalism where comparison was promoted as a criterion for the benefit of academically reliable results to the aesthetic of natural history formal linguistics literature and the historicization of these subjects are all used to trace the circulation of differentiating methods of comparison which always stood in a strained relationship to historicism s complement in speculative analogy German description Zum ersten Mal wird die Geschichte der wissenschaftlichen Methode des Vergleichs in einer interdisziplinären Monographie erfasst die es erlaubt die zu Beginn des 19 Jahrhunderts entstehenden geistes und sozialwissenschaftlich vergleichenden Disziplinen vor allem auch die literaturwissenschaftliche Komparatistik auf ihre epistemologischen Wurzeln und Kontexte zurückzuführen Die für die Genealogie des Vergleichs wichtigsten fachlichen Entwürfe werden vorgestellt ihr Echo in der Literatur wird aufgezeigt Von der Philosophie der Aufklärung und des Rationalismus wo der Vergleich zu einem Kriterium für den Gewinn wissenschaftlich verlässlicher Ergebnisse avanciert über u a die Ästhetik die Naturgeschichte die Sprachwissenschaft die Literatur und deren Historisierung lässt sich die Verbreitung einer differenzierenden Methode verfolgen die immer im spannungsreichen Wechselverhältnis zu ihrem Komplement der spekulativeren Analogie steht
