Beauty Natalie Carnes, 2014-11-13 Beauty engages fourth century bishop Gregory of Nyssa to address beauty s place in theology and the broader world With the recent resurgence of attention to beauty among theologians questions still remain about what exactly beauty is how it is perceived and whether we should celebrate its return If beauty fell out of favor because it was seen to distract from the weightier concerns of poverty and suffering because it can even be a tool of oppression why should we laud it now Gregory s writings offer surprisingly rich and relevant reflections that can move contemporary conversations beyond current impasses and critiques of beauty Drawing Gregory into conversation with such disparate voices as novelist J M Coetzee and art theorist Kaja Silverman Beauty displays the importance of beauty to theology and theology to beauty in a discussion that bridges ancient and modern practical and theoretical secular and religious

Politics of the Anthropocene and Climate Crisis in India Purendra Prasad, Lalatendu

Keshari Das, 2025-10-21 This book focuses on the complex and contested nature of transformation in India from a social and political ecology perspective. Given that the age of Anthropocene is increasingly threatening to undermine the present world order, the countries in the Global South are at the forefront of debates on transformations. By examining issues pertaining to land, labour, and urbanisation from an interdisciplinary perspective, the chapters in this book break down the notion of the Anthropocene into useful analytical categories that represent both the disruptive and constructive natures of the transformation debate. Drawing on empirical research, each author focuses on a particular state or region in the East Coast, East, and Northeast of India to show how states and communities seek transformation, sometimes in competition and/or contestation with each other. The authors in this volume illustrate that although all stakeholders seek transformation, their ideas and discourses nevertheless reflect their situated ethics and unique knowledges of their local, regional, and national contexts. *Politics of the Anthropocene and Climate Crisis in India* will be of interest to students of environmental politics, environmental sociology, political ecology, and South Asian studies more broadly.
