Climate and Energy E. Calvin Beisner, 2024-03-26 The attempted cures for climate change are generally worse than the disease especially for the poor In this groundbreaking volume experts in all the fields related to climate change explain for laymen what we know about climate change and evaluate from a Christian perspective the proposed responses Demands to transform the global energy infrastructure to depend heavily on wind solar and other renewables are harmful to people in America and the world especially to the poor Meanwhile continued large scale use of traditional energy sources like nuclear hydro and fossil fuels would reduce poverty while doing less harm to the environment Climate and Energy The Case For Realism combines outstanding climate science physics economics environmental science political science ethics and theology to present a well reasoned understanding of human induced climate change and how to respond to it

Why Leaders Fail Ethically Cameron A. Batmanghlich, 2014-11-25 Contrary to popular conceptions that ethical failures in leadership are correlated with economic downturns and other stressful market conditions this book argues that such transgressions are an intrinsic element of leadership as it is defined under the current prevailing paradigm In recent years the crisis of failures in ethical leadership across organizations particularly corporations has been highlighted more than ever both in academic discourse and the public sphere Psychological maladies leading to higher number of sick leaves general feelings of disillusionment among employees loss of motivation and employee loyalty even suicide both in Western corporations and in other parts of the world are just a few examples of how ethical failures in leadership are expressed In order to gain original insight into the phenomenon of ethical leadership the author explores the origins and effects of the current leadership paradigm along two dimensions 1 a revisit of the leadership construct from a historical and philosophical perspective with a focus on the relationship between theory and practice and 2 the theoretical roots of the ethical component of leadership theories identifying the reasoning behind the value system in our paradigm Subsequently by linking these constructs together a meta theory emerges suggesting that the three main ethical departure points of virtue ethics teleology and deontology all of which have emerged during the past three thousand years through a confluence of the Abrahamic religions and Greek value systems are the basis for our reasoning about leadership its construct and the practice of leadership itself Challenging traditional views of ethical leadership the author goes beyond theory and philosophy to consider practical implications including alternative ways to improve executive recruitment training and involvement of followers in decision making experiments like rotating leadership and a peek into other paradigms such as the

Zoroastrianism hence making an original contribution to the field of leadership both for scholars and practitioners
