Logical Structures for Representation of Knowledge and Uncertainty Ellen Hisdal, 2013-04-17

It is the business of science not to create laws but to discover them We do not originate the constitution of our own minds greatly as it may be in our power to modify their character And as the laws of the human intellect do not depend upon our will so the forms of science of 1 1 which they constitute the basis are in all essential regards independent of individual choice George Boole 10 p 11J 1 1

Comparison with Traditional Logic The logic of this book is a probability logic built on top of a yes no or 2 valued logic It is divided into two parts part I BP Logic and part II M Logic BP stands for Bayes Postulate This postulate says that in the absence of knowledge concerning a probability distribution over a universe or space one should assume 1 a uniform distribution 2 The M logic of part II does not make use of Bayes postulate or of any other postulates or axioms It relies exclusively on purely deductive reasoning following from the definition of probabilities The M logic goes an important step further than the BP logic in that it can distinguish between certain types of information supply sentences which have the same representation in the BP logic as well as in traditional first order logic although they clearly

have different meanings see example 6 1 2 also comments to the Paris Rome problem of eqs 1 8 1 9 below *Styles of Learning and Teaching* Noel J. Entwistle, 2013-10-31 First Published in 1989 This book is in a sense a text book of educational psychology designed mainly for those with little previous knowledge of the subject But it is not a conventional text book To begin with it does not cover the whole area which normally defines educational psychology It concentrates instead on those aspects which are most directly applicable to understanding the processes related to learning intellectual skills and acquiring knowledge Also the book does not aim to provide a detailed coverage it is deliberately selective in the topics which are covered The main aim is to present an outline or perhaps an overview of current ideas in educational psychology in the hope of providing a more coherent picture of what otherwise tends to be a rather fragmentary set of topics drawn from mainstream psychology Read in conjunction with more conventional textbooks this overview should provide a good guide to the recent literature **Extensionalism: The Revolution in Logic** Nimrod Bar-Am, 2008-04-03 a single life span
