User's Manual to the International Annual Reports Collection ,1989 **Computer Recognition Systems** Marek Kurzynski,Edward Puchala,Michal Wozniak,Andrzej Zolnierrek,2007-12-13 th This book contains papers accepted for presentation at the 4 International Conference on Computer Recognition Systems CORES 05 May 22 25 2005 Rydzyna Castle Poland This conference is a continuation of a series of conferences on similar topics KOSYR organized each second year since 1999 by the Chair of Systems and Computer Networks Wroclaw University of Technology An increasing interest to

those conferences paid not only by home but also by foreign participants inspired the organizers to transform them into conferences of international range Our expectations that the community of specialists in computer recognizing systems will find CORES 05 a proper form of maintaining the tradition of the former conferences have been confirmed by a large number of submitted papers Alas organizational constraints caused a necessity to narrow the acceptance criteria so that only 100 papers have been finally included into the conference program The area covered by accepted papers is still very large and it shows how vivacious is scientific activity in the domain of computer recognition methods and systems It contains various theoretical approaches to the recognition problem based on mathematical statistics fuzzy sets morphological methods wavelets syntactic methods genetic algorithms artificial neural networks ontological models etc Most attention is still paid to visual objects recognition however acoustic textual and other objects are also considered Among application areas medical problems are in majority recognition of faces speech signals and textual information processing methods being also investigated

Advanced High Voltage Power Device Concepts B. Jayant Baliga, 2011-09-21 The devices described in Advanced MOS Gated Thyristor Concepts are utilized in microelectronics production equipment in power transmission equipment and for very high power motor control in electric trains steel mills etc Advanced concepts that enable improving the performance of power thyristors are discussed here along with devices with blocking voltage capabilities of 5 000 V 10 000 V and 15 000 V Throughout the book analytical models are generated to allow a simple analysis of the structures and to obtain insight into the underlying physics The results of two dimensional simulations are provided to corroborate the analytical models and give greater insight into the device operation
