urban industrial transformation is both a challenge and an opportunity Unless steps are taken now to make this transformation more sustainable East Asia s and the world s environmental future is likely to deteriorate seriously Using detailed case studies and rigorous empirical analyses Rock and Angel leading experts in this field show that East Asian governments have found institutionally unique ways to overcome the sustainability challenge As a result of these findings they demonstrate how even low income economies in the rest of the world can use regulatory polices industrial policies and an openness to trade and foreign investment that will increase the competitiveness of their firms whilst improving their environmental performance thus proving an important antidote to those who argue that poor countries cannot afford to clean up their environment whilst their economies remain under developed *Technical Manual* United States.
