Nederlandsch archievenblad, 1913 **De straatnamen van Rotterdam**, 1992 **Lords and Towns in Medieval Europe** Howard B. Clarke, Anngret Simms, 2017-07-14 This volume is based on possibly the biggest single Europe wide project in urban history In 1955 the International Commission for the History of Towns established the European historic towns atlas project in accordance with a common scheme in order to encourage comparative urban studies Although advances in urban archaeology since the 1960s have highlighted the problematic relationship between the oldest extant town plan and the actual origins of a town the large scale cadastral maps as they have been made available by the European historic towns atlas project are still necessary if we want to understand the evolution of the physical form of our towns By 2014 the project consisted of over 500 individual publications from over 18 different countries across Europe Each atlas comprises at least a core map at the scale of 1:2500 analytical maps and an explanatory text The time has come to use this enormous database that has been compiled over the last 40 years This volume itself based on a conference related to this topic that was held in the Royal Irish Academy in Dublin in 2006 takes up this challenge The focus of the volume is on the question of how seigneurial power influenced the creation of towns in medieval Europe and of how this process in turn influenced urban form Part I of the volume addresses two major issues the history of the use of town plans in urban research and the methodological challenges of comparative urban history Parts II and III constitute the core of the book focusing on the dynamic relationship between lordship and town planning in the core area of medieval Europe and on the periphery In Part IV the symbolic meaning of town plans for medieval people is discussed Part V consists of critical contributions by an archaeologist an art historian and an historical geographer By presenting case studies by leading researchers from different European countries this volume combines findings that were hitherto not available in English A comparison of the English and German bibliographies attached to this volume reveals some interesting insights as to how the focus of research shifted over time The book also shows how work on urban topography integrates the approaches of the historian archaeologist and historical geographer The narrative of medieval urbanization becomes enriched and the volume is a genuine contribution to European studies **Bibliografie van de stedengeschiedenis van Nederland** G. van Herwijnen, 2023-08-28 Texts and chronologies illustrating the constitutional and administrative history of European towns through the middle of the thirteenth century Bijdragen en mededeelingen Haghe, 1910 Shopping Spaces and the Urban Landscape in Early Modern Amsterdam, 1550-1850 Clé Lesger, 2025-10-01 In this study the appearance and location of shops in Amsterdam during the early modern period is linked to major changes in the urban economy the size and socio spatial distribution of its population and the structure of the urban grid Not only is there ample attention for the spatial distribution of shops across the urban landscape but for the first time it is also accurately charted what the exterior and interior of Amsterdam shops looked like and how they changed in the course of the centuries Partly as a result of this it has proved possible to give an impression of

the ways in which retailers and customers interacted Levensberichten der afgestorven medeleden van de Maatschappij der Nederlandsche Letterkunde te Leiden, 1920 Verdwenen straatnamen Barend de Ridder (Amsterdam.), 1958 **Die Haghe**, 1912 **Amsterdamsche straatnamen geschiedkundig verklaard** A.
