

HOISTING THE VEHICLE

Always hoist each part of the vehicle at the specified position. Never hoist at any other position because it is very dangerous.

When hoisting the vehicle, sling with a fiber or wire rope at the mast hook hole and the rear end of the head guard.

Slinging the head guard can be done in two illustrated ways.

Case A:

Remove the head guard sheet.

case B:

If the fiber or wire rope comes into contact with a rear combination lamp, remove the lamp ASSY.

CAUTION FOR TOWING

1. When towing the forklift, always lift the rear wheels away from the ground.
2. The traveling speed in towing must not exceed the maximum traveling speed of the forklift.
3. Always set the key switch to OFF and the direction switch to the neutral position before starting towing. In case of towing by connection with a wire rope with the operator on the forklift, however, set the key switch to ON (PS operation) and always set the direction switch to the neutral position.
4. Before towing, either remove the fork or take an action to prevent fork contact with the ground due to bounding.
