Lenzenweger, John F. Clarkin, 2005-01-01 In a fully revised and expanded second edition this landmark

work brings together in one volume the most important current theories of personality disorder. Written by the theorists themselves, all of the chapters have been extensively rewritten to reflect a decade's worth of significant research developments, and two entirely new chapters have been added. Comprehensive and authoritative, this is an indispensable resource and text in a rapidly developing field. Experts from across the theoretical spectrum present their respective approaches, including psychodynamic, interpersonal, attachment, ecological, psychometric, and neurobiological perspectives. Following a consistent format to facilitate reference and comparison, each chapter explicates the core assumptions of the theory at hand and reviews the extent to which it has been validated by empirical research. Coverage includes the ways in which each theory enhances our understanding of causation, classification, mechanisms, and risk factors of personality pathology, as well as how it has contributed to measurement, diagnosis, and treatment. The volume also explores similarities and differences among the various theories and identifies potential avenues of integration. This volume belongs on the desks of clinicians, researchers, and students in clinical psychology, clinical social work, and psychiatry. It serves as a uniquely informative text in advanced undergraduate and graduate level courses.

Psycho-Legal Concepts for Parenting in Child Custody and Child Protection Vol. 4 Don Tustin, 2024-12-01. This book provides an overview of changes in legislation in Australia concerning both family law and child protection law. The topic is important as the Australian Government has identified that the rate of mental disorder in some cohorts of children is high and rising. These cohorts of children live in families where they are vulnerable because they are exposed to risk factors that can be changed by a coordinated effort from parents, therapists, and lawyers. The aim of the book is to identify psycho-legal concepts that need to be understood by professionals who work in the fields of child custody and child protection and to bring these concepts together to improve coordination between the two fields of practice. The purpose of the book is to be a practice manual for professionals from the disciplines of law, social work, and psychologists who work in specialized legal roles dealing with families where children are vulnerable to developing mental health difficulties. Volume 4 of the book provides a perspective from a mental health clinician about concepts and principles that arise in Australian family-oriented courts and that need to be shared between disciplines. This book proposes that some concepts be identified as psycho-legal as the concepts need to be shared between disciplines who work with court-involved families. The book also proposes that psycho-legal concepts be shared between the jurisdictions of child custody and child protection. In this book, proposals are made to improve collaboration between disciplines and to maximize the best interests of children.
