Treating Trauma-Related Dissociation Kathy Steele,Suzette Boon,Onno van der Hart,2016-11-29 Winner of the 2017 International Society for the Study of Trauma and Dissociation ISSTD Pierre Janet Writing Award Establishing safety and working with dissociative parts in complex trauma therapy Therapists around the world ask similar questions and struggle with similar challenges treating highly dissociative patients This book arose not only out of countless hours of treating patients with dissociative disorders but also out of the crucible of supervision and consultation where therapists bring their most urgent questions needs and vulnerabilities The book offers an overview of the neuropsychology of dissociation as a disorder of non realization as well as chapters on assessment prognosis case formulation treatment planning and treatment phases and goals based on best practices The authors describe what to focus on first in a complex therapy and how to do it how to help patients establish both internal and external safety without rescuing how to work systematically with dissociative parts of a patient in ways that facilitate integration rather than further dissociation how to set and maintain helpful boundaries specific ways to stay focused on process instead of content how to deal compassionately and effectively with disorganized attachment and dependency on the therapist how to help patients integrate traumatic memories what to do when the patient is enraged chronically ashamed avoidant or unable to trust the therapist and how to compassionately understand and work with resistances as a co creation of both patient and therapist Relational ways of being with the patient are the backbone of treatment and are themselves essential therapeutic interventions As such the book also focused not only on highly practical and theoretically sound interventions not only on what to do and say but places strong emphasis on how to be with patients describing innovative compassionately collaborative approaches based on the latest research on attachment and evolutionary psychology Throughout the book core concepts fundamental ideas that are highlighted in the text in bold so they can be seen at a glance are emphasized These serve as guiding principles in treatment as well as a summing up of many of the most important notions in each chapter Each chapter concludes with a section for further examination These sections include additional ideas and questions exercises for practicing skills and suggestions for peer discussions based on topics in a particular chapter meant to inspire further curiosity discovery and growth

Rethinking Trauma Treatment Courtney Armstrong,2019-06-25 Creating safety hope and secure attachment to transform traumatic memories What makes trauma therapy effective The answers might surprise you While therapists have been bombarded with brain science hundreds of new models and pressure to use evidence based techniques research has demonstrated that the therapeutic relationship ultimately predicts therapy outcomes This is

especially true for traumatized clients But what kind of therapeutic relationship Forming a secure therapeutic alliance with traumatized clients is tricky How do you help clients trust you after they ve been abused betrayed or exploited How do you instill hope and convince clients who ve been devastated by loss to believe that a better life is possible In this accessible guide Courtney Armstrong distills discoveries from attachment theory brain science and post traumatic growth into practical strategies you can use to 1 build trust and a secure therapeutic relationship 2 transform traumatic memories into stories of triumph and courage and 3 help clients cultivate resilience and a positive post trauma identity Packed with dozens of scripts step by step worksheets and inspiring client stories this book gives you tools for each phase of the trauma therapy process and shows you how to Engage and motivate clients based on their attachment style Manage trauma related dissociation anxiety and anger Transform traumatic memories so they no longer haunt your client Work with different types of trauma from sexual abuse to traumatic grief Evoke inner resources for healing and positive emotional states Counter compassion fatigue and burnout so you can thrive as a therapist Merely talking about a traumatic event is not enough because the parts of the brain where traumatic implicit memories are stored don t understand words Heartfelt relational experiences catalyze brain change and buffer the impact of trauma In this book Armstrong demonstrates that neuroscience is validating what therapists have suspected all along the brain changes through the heart

When Ancestors Weep James A. Houck Jr. Ph.D., 2018-11-08 We are all beautiful souls made in the image of God full of inherent value dignity and worth Yet we may struggle to accept this truth because our attention is often diverted to focus solely on outward appearances and behaviors In other words we all live with some degree of ignorance of our soul consciousness We may get glimpses of it but we never attain the full extent because physical emotional and psychological issues cloud our vision of who we truly are For example diseases and illnesses do afflict us in the body We do feel physical and emotional pain with so much intensity at times that we believe it is going to break us in two At times our lungs may struggle to take a breath or hunger and diseases cause our stomach intestines bones muscles and blood to scream in agony These experiences might make us

question whether or not we are the soul whom God has created However this illusion lies not in the suffering pain and agony we experience but rather it is in the perception that there is nothing more to us than an emotional intellectual and physical body Indeed physical and emotional pain and suffering can temporarily drown out the cry of our soul but our soul is never silenced Furthermore the truth is that the greatest strength of who we are as souls lies in our ability to transform and transcend physical emotional and psychological limitations The greatest effect hearing the cries of our ancestors has on us not only comes from getting in touch with our own soul's voice but also awakens us to hear the cries of those who have no voice today There has always existed in society a pattern of disenfranchising the weak and wounded people who have been labeled as unlovable untouchable and therefore unreachable For some disenfranchisement was due to their disease or illness For others it was due to their poverty Still for others it was due to their gender race religion politics or social class Many in society preferred such people not to be seen let alone heard from However just as the cries of our ancestors and those who have been the victims of crimes against humanity can never be silenced and so too are the cries of the disenfranchised heard above the din of everyday life Their cries are not only heard deep within the soul but their pain is also given a voice through those who speak for them

The Power of Attachment Diane Poole Heller, Ph.D., 2019-03-12 How traumatic events can break our vital connections and how to restore love wholeness and resiliency in your life From our earliest years we develop an attachment style that follows us through life replaying in our daily emotional landscape our relationships and how we feel about ourselves And in the wake of a traumatic event such as a car accident severe illness loss of a loved one or experience of abuse that attachment style can deeply influence what happens next In *The Power of Attachment* Dr Diane Poole Heller a pioneer in attachment theory and trauma resolution shows how overwhelming experiences can disrupt our most important connections with the parts of ourselves within with the physical world around us and with others The good news is that we can restore and reconnect at all levels regardless of our past Here you'll learn key insights and practices to help you Restore the broken connections caused by trauma Get embodied and grounded in your body Integrate the parts of yourself that feel wounded and fragmented Emerge from grief fear and powerlessness to regain strength joy and resiliency Reclaim access to your inner resources and spiritual nature We are fundamentally designed to heal teaches Dr Heller Even if our childhood is less than ideal our secure attachment system is biologically programmed in us and our job is to simply find out what's interfering with it and learn what we can do to make those secure tendencies more dominant With expertise drawn from Dr Heller's research clinical work and training programs this book invites you to begin that journey back to wholeness
