Trilogy 100 Clinical Manual:

Non Invasive Mechanical Ventilation Junaid Malik MD D. ABSM,2018-12-06 This book was initially started to help with understanding and organizing what I needed to know about the two most common NIMV noninvasive mechanical ventilation units ie Trilogy and Astral As I presented this information at various lectures it was clear to me that there was no guide that could be used in the setup of these machines The most common mode of ventilation in each was AVAPS and iVAPS respectively Most of the initial difficulty is getting into the main menus of the machines Once this is accomplished one can easily change and adjust each of the machines My hope is to impart the knowledge I have gained out of necessity to others The hope is to have a step by step method of entering the menu and then moving through the various settings I have concentrated on the two main modes of ventilation on each of the machines as the other modes available are variations on the two main modes As one understands and allows for more experience with these machines it will hopefully allow for more expertise in these field In the NIMV clinic I have patients sit in a recliner and then I place them on these machines with a mask of the patient s choosing Then based on trial and error I start adjusting the pressures Once the pressures and settings feel right to the patient I allow the patient to recline and take a small nap While they are napping I have a continuous pulse oximetry which can be added to these machines to monitor the oxygen saturation By the end of the clinic I have the exact settings and give this to the DME durable medical equipment company In follow up I know exactly what the settings are and if they are tolerable to the patient

Mechanical Ventilation David C. Shelledy,Jay I. Peters,2019-03-28 Mechanical Ventilation provides students and clinicians concerned with the care of patients requiring mechanical ventilatory support a comprehensive guide to the evaluation of the critically ill patient assessment of respiratory failure indications for mechanical ventilation initiation of mechanical ventilatory support patient stabilization monitoring and ventilator discontinuance The text begins with an introduction to critical respiratory care followed by a review of respiratory failure to include assessment of oxygenation ventilation and acid base status A chapter is provided which reviews principles of mechanical ventilation and commonly used ventilators and related equipment Indications for mechanical ventilation are next discussed to include invasive and non invasive ventilation Ventilator commitment is then described to include establishment of the airway choice of ventilator mode of ventilation and initial ventilator settings Patient stabilization is then discus
