Facebook Twitter Google today's tech savvy students are always plugged in. However, all too often their teachers and administrators aren't experienced in the use of these familiar digital tools. If schools are to prepare students for the future, administrators and educators must harness the power of digital technologies and social media. With contributions from authorities on the topic of educational technology, *What School Leaders Need to Know About Digital Technologies and Social Media* is a compendium of the most useful tools for any education setting. Throughout the book, experts including Will Richardson, Vicki Davis, Sheryl Nussbaum Beach, Richard Byrne, Joyce Valenza, and many others explain how administrators and teachers can best integrate technology into schools, helping to make sense of the often confusing world of social media and digital tools. They offer the most current information for the educational use of blogs, wikis, and podcasts; online learning; open source courseware; educational gaming; social networking; online mind mapping; mobile phones; and more, and include examples of these methods currently at work in schools. As the book clearly illustrates, when these tools are combined with thoughtful and deliberate pedagogical practice, it can create a transformative experience for students, educators, and administrators alike. *What School Leaders Need to Know About Digital Technologies and Social Media* reveals the power of information technology and social networks in the classroom and throughout the education community.
