When I Am Little Again And The Child's Right To Respect:

When I Am Little Again and The Child's Right to Respect Janusz Korczak, 1992-01-27 These two works belong to that group of books written by one of this century's fiercest and most devoted child advocates. In the first Korczak uses fiction to reveal the joys and sorrows of a child, a ten-year-old juxtaposing them against the feelings of an adult as they both react to two days of adventure spent together. Two prominent themes in his writing are the exploration of the place of children in an adult world and the examination of the treatment and regard children are accorded in that world. In his second book Korczak spells out his Magna Charta Libertatis in defense of the child's right to respect, right to be him or herself and most importantly right to respect for the strenuous effort expended in the process of growing up. *Utopia and Education. Studies in Philosophy, Theory of Education and Pedagogy of Asylum* Rafał Włodarczyk, 2022-01-01 Utopia and Education is an original contribution of the philosophy and theory of education which also enters the fields of disciplines other than pedagogy and uses their approaches and achievements. The work is part of utopian studies and complements its discourse with a less marked path of philosophy and theory of education. Moreover, in the context of pedagogy and education it takes up a number of issues whose significance goes beyond the conventional framework of a single discipline: utopia, ideology, social criticism, fundamentalism, democracy, populism, translation, transdisciplinarity and knowledge transfer, socialisation, school as one of the social institutions, etc. The work not only reconstructs knowledge about specific phenomena relevant to education and pedagogy but also proposes an original solution to educational problems in the form of the concept of asylum pedagogy. The approach to these phenomena is well reflected in the division of the book into two parts. The book, apart from references to researchers associated with utopian studies, addresses ideas of such figures of the humanities and social sciences as Emmanuel Levinas and Erich Fromm; their concepts were earlier used by the Author in two monographs. Besides, there are references to Bronisław Baczko, George Steiner, Jacques Derrida, Michael Walzer, Hannah Arendt, Janusz Korczak and Ilan Gurevich. Throughout the work the Author attempts to combine the perspectives of critical pedagogy and dialogue, finds inspiration in the achievements of the Warsaw School of the History of Ideas and draws on Jewish thought and tradition.

The Oxford Handbook of Children's Rights Law Jonathan Todres, Shani M. King, 2020-02-19 Children's rights law is a relatively young but rapidly developing discipline. The UN Convention on the Rights of the Child, the field's core legal instrument, is the most widely ratified human rights treaty in history. Yet like children themselves, children's rights are often relegated to the margins in mainstream legal, political and other discourses despite their application to approximately one third of the world's population and every human being's first stages of life. Now thirty years old, the Convention on the Rights of the Child (CRC) signalled a definitive shift in the way that children are viewed and understood from passive objects subsumed within the family to full human beings with a distinct set of rights. Although the CRC and other children's rights law have spurred positive changes in law, policies and attitudes toward children in numerous countries, implementation

remains a work in progress We have reached a state in the evolution of children s rights in which we need more critical evaluation and assessment of the CRC and the large body of children s rights law and policy that this treaty has inspired We have moved from conceptualizing and adopting legislation to focusing on implementation and making the content of children s rights meaningful in the lives of all children This book provides a critical evaluation and assessment of children s rights law including the CRC With contributions from leading scholars and practitioners from around the world it aims to elucidate the content of children s rights law explore the complexities of implementation and identify critical challenges and opportunities for children s rights law

Janusz Korczak Joop W. A. Berding, 2020-10-29 This book presents the educational view and practice of the Polish Jewish doctor writer and pedagogue Janusz Korczak Warsaw 1878 Treblinka 1942 In the authors reconstruction five core elements stand out respect for every child participation justice dialogue as expression and communication self awareness and reflection on the part of the educator These elements do not constitute a well rounded theory or philosophy but are part of many stories of living together with children in Korczak s case orphans Korczak actively involving the children themselves organized this life in such a way that justice ruled He is the pedagogue of narrativity and of democratic upbringing Korczak explored many and today still challenging ways of participative education The book shows that besides the now domineering positivist outlook on education with its technocratic language and stress on output standards testing etc another language is possible one that is more practice based and that teachers will relate to immediately love for children a pedagogical ethos and seeking ways to live together in a just way
