Gender, War, and World Order Richard C. Eichenberg, 2019-06-15 Motivated by the lack of scholarly understanding of the substantial gender difference in attitudes toward the use of military force Richard C Eichenberg has mined a massive data set of public opinion surveys to draw new and important conclusions By analyzing hundreds of such surveys across more than sixty countries Gender War and World Order offers researchers raw data multiple hypotheses and three major findings Eichenberg poses three questions of the data Are there significant differences in the opinions of men and women on issues of national security What differences can be discerned across issues culture and time And what are the theoretical and political implications of these attitudinal differences Within this framework Gender War and World Order compares gender difference on military power balance of power alliances international institutions the acceptability of war defense spending defense welfare compromises and torture Eichenberg concludes that the centrality of military force violence and war is the single most important variable affecting gender difference that the magnitude of gender difference on security issues correlates with the economic development and level of gender equality in a society and that the country with the most consistent gender polarization across the widest range of issues is the United States

Between Families and Frankenstein Erin Heidt-Forsythe, 2018-06-22 In the United States egg donation for reproduction and egg donation for research involve the same procedures the same risks and the same population of donors disadvantaged women at the intersections of race and class Yet cultural attitudes and state level policies regarding egg donation are dramatically different

The Silent Sex Christopher F. Karpowitz, Tali Mendelberg, 2014-08-24

Do women participate in and influence meetings equally with men? Does gender shape how a meeting is run and whose voices are heard? *The Silent Sex* shows how the gender composition and rules of a deliberative body dramatically affect who speaks, how the group interacts, the kinds of issues the group takes up, whose voices prevail, and what the group ultimately decides. It argues that efforts to improve the representation of women will fall short unless they address institutional rules that impede women's voices. Using groundbreaking experimental research supplemented with analysis of school boards, Christopher Karpowitz and Tali Mendelberg demonstrate how the effects of rules depend on women's numbers: so that small numbers are not fatal with a consensus process, but consensus is not always beneficial when there are large numbers of women. Men and women enter deliberative settings facing different expectations about their influence and authority. Karpowitz and Mendelberg reveal how the wrong institutional rules can exacerbate women's deficit of authority, while the right rules can close it and, in the process, establish more cooperative norms of group behavior and more generous policies for the disadvantaged. Rules and numbers have far-reaching implications for the representation of women and their interests. Bringing clarity and insight to one of today's most contentious debates, *The Silent Sex* provides important new findings on ways to bring women's voices into the conversation on matters of common concern.
