web q2 what is the disadvantage of fractional crystallization the disadvantage of fractional crystallization is that with each increase in crystallization step number we lose KNO_3 the graph shows that as crystallization number increases the of the original KNO_3 mass recovered decreases in the first

fractional crystallization chemistry libretexts - Aug 03 2023

web fractional crystallization is a method of refining substances based on differences in solubility it fractionates via differences in crystallization forming of crystals if a mixture of two or more substances in solution are allowed to crystallize for example by allowing the temperature of the solution to decrease the precipitate will
