BADIN François,2013-07-04 The fast growth in world population and the associated energy requirements the announced depletion of fossil fuel resources the continuing rise in greenhouse gas GHG emissions with the induced climatic changes represent some of the major challenges to be taken up in the coming years and decades Hybridization therefore typically represents a transition technology which can significantly improve the energy and environmental performance of current vehicles without radically changing their use typologies while opening the way to new propulsion modes for the longer term It is nevertheless a complex subject requiring a multidisciplinary approach This book which is intended to be exhaustive considers the vehicle its components their association and their control as well as the global balances determined over the vehicle lifetime It starts with a general presentation of the various conditions of use of vehicles to give readers an understanding of the stakes related to the development of hybrid vehicles and the methods used to compare the performance of the various solutions The principles and the various types of internal combustion engine and electrical drives onboard energy storage systems principles architectures specific components and operation of hybrid drivetrains as well as the energy management in these vehicles are developed A global analysis of the various drivetrains life cycle assessment LCA total costs and availability of sensitive materials is also provided This book is intended for everyone involved in the design manufacture and implementation of hybrid drive vehicles and their components It will also be of interest to students teachers and researchers wishing to acquire or further their knowledge in all fields impacted by drivetrain electrification More globally after consulting this book readers will be in a position to evaluate the technologies related to the concept of drivetrain hybridization their implementation balances and generalization conditions This book is available in French Under the title *Véhicules hybrides* Contents 1 Vehicle use 2 Internal combustion engines 3 Electric drivetrain 4 On board energy storage systems 5 Hybridization 6 Control of hybrid vehicles 7 Comparative study of hybrid vehicles greenhouse gas emissions energy consumption and cost Appendixes

And On That Bombshell Richard Porter,2015-10-22 I was Top Gear s script editor for 13 years and all 22 series I basically used to check spelling and think of stupid gags about The Stig I also got to hang around with Jeremy Clarkson Richard Hammond and James May It didn t feel like something you should get paid for From the disastrous pilot show of 2002 to the sudden and unexpected ending in 2015 working on Top Gear was quite a rollercoaster ride We crossed continents we made space ships we bobbed across the world s busiest shipping lane in a pick up truck We also got chased by an angry mob repeatedly sparked fury in newspapers and almost killed one of our presenters I realised that I had quite a few stories to tell from behind the scenes on the show I remembered whose daft idea it was to get a dog I recalled the willfully stupid way in which we decorated our horrible office I had a sudden flashback to the time a Bolivian drug lord threatened to kill us I decided I should write down some of these stories So I have I hope you like them And now a quote from James May Richard Porter has asked me to write a quote for his new book about the ancient history of Top Gear But this is a ridiculous request How can one write a quote Surely by definition a quote must be extracted from a

greater body of writing for the purpose of illustrating or supporting a point in an unrelated work I cannot write a quote any more than I could film an out take Porter like Athens has lost his marbles **Advanced Research on Mechanical Engineering, Industry and Manufacturing Engineering III** Helen Zhang, David Jin, X.J.
