

HIGH SCHOOL PACING GUIDE

TRIGONOMETRY

QTR	COMPETENCY/OBJECTIVES
NUMBER AND OPERATIONS	
	1. Represent and compare numbers in various forms and perform operations.
1.1	a. Perform conversions across measurement systems including degree to radian measurements of angles, radian measurements to degree measurements of angles, polar to rectangular coordinates, rectangular to polar coordinates, rectangular to trigonometric forms of complex numbers, and trigonometric to rectangular forms of complex numbers. (DOK 1)
1.2	b. Determine the product and quotient of complex numbers in trigonometric form. (DOK 1)
1.2	c. Apply De Moivre's theorem to determine the n th roots of a complex number given in polar form. (DOK 1)
1.2	d. Explain the addition formulas for sine and cosine and use them to prove (or simplify) other trigonometric functions. (DOK 2)
	2. Investigate basic concepts of vectors and operations with vectors.
1.2	a. Recognize and draw different notations for vectors to represent a quantity. (DOK 1)
1.2	b. Analyze properties of vectors and the effects of these properties on operations with vectors. (DOK 2)
1.2	c. Apply the limit definition of e . (DOK 2)
ALGEBRA	
	3. Compare and produce equivalent forms of trigonometric expressions and solve trigonometric equations.
1.1	a. Determine the domain and range of trigonometric functions. (DOK 2)
1.1-1.2	b. Identify and apply trigonometric identities. (DOK 2)
1.1	c. Verify identities analytically and with technology. (DOK 2)
1.2	d. Solve trigonometric equations in real-world situations or mathematical settings. (DOK 2)
GEOMETRY	
	4. Use geometric modeling to analyze trigonometric relationships.
1.1	a. Use the unit circle to solve real-world applications and problems in mathematical settings. (DOK 3)
1.1	b. Apply the six trigonometric functions in relation to a right triangle to solve real-world applications and problems in mathematical settings. (DOK 3)
1.1	c. Find exact values of trigonometric functions of special angles in the unit circle. (DOK 1)

Eureka Math is a comprehensive content-rich PreK-12 curriculum that follows the focus and coherence of the Common Core State Standards in Mathematics (CCSSM) and carefully sequences the mathematical progressions into expertly crafted instructional modules. The companion Study Guides to Eureka Math gather the key components of the curriculum for each grade into a single location, unpacking the standards in detail so that both users and non-users of Eureka Math can benefit equally from the content presented. Each of the Eureka Math Curriculum Study Guides includes narratives that provide educators with an overview of what students should be learning throughout the year, information on alignment to the instructional shifts and the standards design of curricular components, approaches to differentiated instruction, and descriptions of mathematical models. The Study Guides can serve as either a self-study professional development resource or as the basis for a deep group study of the standards for a particular grade. For teachers who are new to the classroom or the standards, the Study Guides introduce them not only to Eureka Math but also to the content of the grade level in a way they will find manageable and useful. Teachers familiar with the Eureka Math curriculum will also find this resource valuable as it allows for a meaningful study of the grade-level content in a way that highlights the coherence between modules and topics. The Study Guides allow teachers to obtain a firm grasp on what it is that students should master during the year. The Eureka Math Curriculum Study Guide Grade 8 provides an overview of all of the Grade 8 modules, including Integer Exponents and Scientific Notation, The Concept of Congruence, Similarity, Linear Equations, Examples of Functions from Geometry, Linear Functions, Introduction to Irrational Numbers, Using Geometry. *A Starter Guide to College for Clueless Students & Parents* Jake D. Seeger, 2019-01-05. For 8th graders, freshmen, and sophomores, here's what to do now. For juniors and seniors, here are details about the tests, the applications, admissions, factors, financial aid, essays, interviews, and college selection. Checklists are provided for each year of high school. A comprehensive checklist for the application for each college is provided. It is a reference book for these many details for when you need them. Use some chapters now and come back to other chapters later, even in a year or more. For 8th and 9th Graders, get a great start on high school by seeing what to do your freshman and sophomore years so you're not behind in junior and senior years. Which colleges are realistic? Which are affordable? Do not count any of them out yet. Can you get a great degree without a huge debt? Sure, if you make the right choices. These topics are covered: How to get college-ready and admissions-ready, Benefits of community colleges and public colleges, Selective admissions, factors and expectations, Activities, internships, and sports, Practice for standardized tests and subject tests, Application checklists and procedures, Financial aid and cost comparisons, Meeting admissions officials, and Essays and interviews. After knowing more, students and parents can better discuss and think about all these factors to decide if college is indeed the best option and what type of college is best. The book explains the basics and moves into detailed information that you may not need right away but probably will use later. It has handy

reference pages containing checklists testing rules calendars admissions statistics college degree levels and websites to use so you don't have to look everything up yourself You don't have to remember everything now You can go back to the book again and again when you need the information For the maze of selective college applications admissions and choices the Starter Guide explains the basics and then provides a detailed analysis of the situation presents a detailed plan of action and points you to some of the best sources for even more information to complete a serious run for the Ivies and the other top 50 to top 150 colleges But the great options of public colleges aren't neglected as the benefits of community colleges public honors colleges tuition discounts in nearby states affordable regional colleges and flagship universities are explained Finances and financial aid are covered with estimates of what to expect from both public and private colleges with examples for various household income levels Students and parents will find advice on how to meet admissions staff Learn how to build an impressive record based on what the colleges are looking for Students will find practical advice on how to make the best impression with their attire conversational interactions paperwork and correspondence Learn which questions to ask and how to best convey your story while knowing what things to avoid doing and there are a few High school guidance counselors will like the reference information on testing test by test 8th grade to 12th grade in reference summary pages and admissions statistics The book covers test schedules reporting fees fee waivers test cancellation procedures information websites admissions events admissions statistics for 120 colleges in one spot the publisher looked them up and calculated them so you don't have to See about fine print admissions details like the lowest test scores for admissions at a college The Starter Guide to College for Clueless Students Parents is a good value It doesn't have to be read all at once but can guide a student and the parents as time passes even loaned to others

Research in Education ,1970 **New York Math: Math B** ,2000 Teach Math Like This, Not Like That Matthew L. Beyranevand,2017-05-24 Teaching mathematics is one of the most difficult and important jobs that anyone can do Mathematics is a critical part of education and an essential building block for problem solving skills that are needed in the real world However many students struggle to learn and understand mathematical concepts and educators need to do everything possible to help our students learn This book focuses on four areas necessary to be an impactful teacher of mathematics Planning Pedagogy Assessment and Relationships For each of the ideas presented in the book a brief introduction will be shared and then two different perspectives will be detailed with examples The first is Not like This which is often the traditional way of teaching mathematics or the less effective approach The second perspective is Teach Like This which is my recommended approach based upon research and my own experience as a teacher math coordinator and graduate instructor of math education
