Technologies Will Mari,2019-02-07 A Short History of Disruptive Journalism Technologies provides a swift analysis of the computerization of the newsroom from the mid 1960s through to the early 1990s It focuses on how word processing and a number of related affordances including mobile reporting tools impacted the daily work routines of American news workers

The narrative opens with the development of mainframes and their attendant use as databases in large daily newspapers. It moves on to the minicomputer era and explores initial news worker experiences with computers for editing and publication. Following this, the book examines the microprocessor era and the rise of smart terminals, microcomputers, and off-the-shelf hardware software along with the increasing use of computers in smaller news organizations. Mari then turns to the use of pre-internet networks, wire services, and bulletin boards deployed for user interaction. He looks at the integration of decentralized computer networks in newsrooms with a mix of content management systems and PCs, and the increasing use of pagers and cellphones for news gathering, including the shift from portable to mobile conceptualizations for these technologies. *A Short History of Disruptive Journalism Technologies* is an illuminating survey for students and instructors of journalism studies. It represents an important acknowledgement of the impact of pre-internet technological disruptions which led to the even more disruptive internet and related computing technologies in the latter 1990s and through the present.

Green, who taught philosophy and drama at the University of North Carolina at Chapel Hill, won the Pulitzer Prize in 1927 for *In Abraham's Bosom*, an authentic drama of black life. Among his other Broadway productions were *Native Son* and *Johnny Johnson*. From the 1930s onward, Green created fifteen outdoor historical productions known as symphonic dramas, thereby inventing a distinctly American theater form. These include *The Lost Colony* (1937), which is still performed today. Laurence Avery has selected and annotated the 329 letters in this volume from over 9,000 existing pieces. The letters to such figures as Sherwood Anderson, Langston Hughes, Richard Wright, John Dos Passos, Zora Neale Hurston, and others interested in the arts and human rights in the South are alive with the intellect, buoyant spirit, and sensitivity to the human condition that made Green such an inspiring force in the emerging New South. Avery's introduction and full bibliography of the playwright's works and first productions give readers a context for understanding Green's life and times. The Origins of Catholic Evolutionism, 1831-1950 Kenneth W. Kemp, 2025 The history of the Catholic Church's response to evolutionary biology has often been badly misrepresented as antagonistic. In fact, its response is better characterized as a long process of accommodation. This work is a comprehensive introduction to the work of the Catholic scientists and theologians who worked out the details of that accommodation. Few Catholics found the evolutionary origin of plant and animal species theologically objectionable.

None thought that evolutionary processes provided a sufficient account of the origin of the first human beings Catholics differed over whether those processes played a role in the origin of the first human body Catholic evolutionism began with the work of four nineteenth century scientists who might be called the pioneers of Catholic evolutionism Belgian geologist Jean Baptiste d Omalius d Halloy English anatomist George Mivart Italian anatomist Filippo De Filippi and French paleontologist Albert Gaudry The next generations of Catholic evolutionists writing in the period from about 1890 1940 included scientists Jesuit entomologists Erich Wasmann and Felix R schkamp as well as priests who focused more exclusively on the question of compatibility Dalmace Leroy John Zahm Henry de Dorlodot and Ernest Messenger Among the scientists might also be included French paleontologist Pierre Teilhard de Chardin who made some contributions to the general idea of the compatibility of evolutionary biology and Catholic theology but who eventually veered off in the direction of a comprehensive evolutionary theology of nature the details of which are beyond the scope of this book Catholic anti evolutionists made efforts to have the Church prohibit works of Catholic evolutionism that in their judgment gave evolutionary processes too great a r le in the formation of the human body or that relied on problematic principles of hermeneutics Efforts on the former front were eventually blocked by Pope Pius XI The first magisterial statement on the question came however only in 1950 with Pope Pius XII s encyclical Humani generis which provisionally declared the orthodoxy of evolutionary accounts of the origin of the human body In addition to providing details about Catholic evolutionists and the magisterium the book also reviews the treatment of the new ideas in Catholic encyclopedias periodicals and textbooks Although written in the first instance as a work of scholarship the book was also written with attention to the needs of scientists priests and members of the general public who are interested in the question
