Querying MapReduce Views in CouchDB Bradley Holt, 2011-02-04 If you want to use CouchDB to support real world applications you'll need to create MapReduce views that let you query this document oriented database for meaningful data. With this short and concise ebook you'll learn how to create a variety of MapReduce views to help you query and aggregate data in CouchDB's large distributed datasets. You'll get step by step instructions and lots of sample code to create and explore several MapReduce views through the course of the book using an example database you construct. To work with these different views you'll learn how to use the Futon web administration console and the cURL command line tool that come with CouchDB. Learn how the Map and Reduce steps work independently and together to index your data. Use the example database to create several temporary views based on different criteria. Discover the uses of Map and Reduce JavaScript functions. Convert your temporary views to permanent views within a design document. Learn several options for querying the data within your views. Limit the number of results returned, skip some results or reverse the order of the output. Group your results by exact keys or by parts of keys. Bradley Holt, co-founder of the creative services firm Found Line, is a web developer and entrepreneur with ten years of PHP and MySQL experience. He began using CouchDB before the release of version 1.0. Bradley is an active member of the PHP community and can be reached at bradley@holt.com.

Making Embedded Systems Elecia White, 2011-10-25 Interested in developing embedded systems? Since they don't tolerate inefficiency, these systems require a disciplined approach to programming. This easy-to-read guide helps you cultivate a host of good development practices based on classic software design patterns and new patterns unique to embedded programming. Learn how to build system architecture for processors, not operating systems, and discover specific techniques for dealing with hardware difficulties and manufacturing requirements. Written by an expert who's created embedded systems ranging from urban surveillance and DNA scanners to children's toys, this book is ideal for intermediate and experienced programmers, no matter what platform you use. Optimize your system to reduce cost and increase performance. Develop an architecture that makes your software robust in resource-constrained environments. Explore sensors, motors, and other I/O devices. Do more with less: reduce RAM consumption, code space, processor cycles, and power consumption. Learn how to update embedded code directly in the processor. Discover how to implement complex mathematics on small processors. Understand what interviewers look for when you apply for an embedded systems job. *Making Embedded Systems* is the book for a C programmer who wants to enter the fun and lucrative world of embedded systems. It's very well written, entertaining, even, and filled with clear illustrations. Jack Ganssle, author and embedded system expert.
