Eijdenberg, 2019-07-01 Women accomplish nearly two thirds of total work around the world including household duties comprise one third of the formal labor force but women receive one tenth of the world's income and own only one hundredth of the world's property Entrepreneurship is a vehicle for advancing the lives of women around the world This book brings together 49 distinguished entrepreneurship scholars to provide a unique global vision of the wellbeing of women entrepreneurs necessary for fostering sustainable development and inclusive societies Although gender inequality is an

important issue solutions leading to gender parity are far from reaching ideal levels in the formal workplace and globally. Meanwhile the number of women involved in entrepreneurship is growing exponentially because there are more opportunities for women to own a business and be their own boss. This offers women the most desirable and flexible working conditions that better align with women's lifestyles and multiple family responsibilities. However entrepreneurial activities are demanding and complex compared to men; women face special challenges that deserve close attention. This book presents research and programs to effectively support women entrepreneurs in reaching levels of wellbeing required to ensure business sustainability and personal prosperity. Offering a diversity of perspectives from around the globe, *The Wellbeing of Women in Entrepreneurship* is of great interest to academics and practitioners working in teaching and research in disciplines including business management, entrepreneurship, organizational change, human-centered management, human resources, sustainable development, and women's studies.

Negotiating Gender, Policy and Politics in the Caribbean Gabrielle Hosein, Jane Parpart, 2016-12-22. Have efforts to advance women's and men's commitments to democratic governance, women's rights, and gender equality been successful in the Caribbean? Do they reflect local as well as international concerns and visions of gender equality? This edited collection answers these questions by focusing on women's political leadership, electoral quota systems, national gender policies, and transformational leadership as four feminist strategies that aim to engender democracy and citizenship. It offers a rich historical, comparative, and ethnographic perspective on the lived experience of these strategies through case studies of Trinidad and Tobago, Guyana, Dominica, Jamaica, and St. Lucia. Drawing on national policy debates, election campaigns, state officials' solidarities, men's gender consciousness, and women leaders' life histories across these five Caribbean countries, the collection assesses the successes of transnational feminist efforts, the resilience of masculinist resistances, the limits of gender mainstreaming, and the possibilities for gender justice in and beyond the Caribbean today.

Entrepreneurial Women in the Caribbean Talia R. Esnard, 2022-10-27. Adopting an intersectional lens, this book comparatively examines the multiple processes and systems of power that frame the experiences of female entrepreneurs in the Caribbean and the fluid ways in which they respond to these. Specifically, it challenges entrepreneurial scholars who are concerned with the experiences of women within that sector to critically interrogate interlocking structures of power, e.g., gender, race, class, age, industry-based hierarchies that operate within that space, the marginalizing effects of related processes, and the extent to which these affect their thinking and practices of female entrepreneurs within the region. Through comparative lenses, the book highlights the structural and relational realities and complexities that undergird the entrepreneurial landscape within the region, the effects of these on the entrepreneurial identities, positionalities, and practices of female entrepreneurs. It underscores the many ways in which they navigate that terrain. In so doing, the book offers critical insights into the historical, socio-cultural, and economic parameters within which female entrepreneurs in the region engage the lived realities associated with these, the prospects, or

possibilities for re presenting or re framing such contextual and discursive spaces It also provides necessary understandings of the motivations positions prospects possibilities and constrains of entrepreneurial women in the region and the policy implications of these realities This book offers insights for scholars and policymakers that are important for i understanding the current gaps in entrepreneurial research and policy ii the tools methods and strategies that are needed to address these contextual and discursive realities and ultimately iii the ways in which policy makers and local governments can promote the authentic empowerment of female entrepreneurs in the region while giving considerations to precarious realities of women

Virgin Capital Tami Navarro, 2021-11-01 Virgin Capital examines the cultural impact and historical significance of the Economic Development Commission EDC in the United States Virgin Islands A tax holiday program the EDC encourages financial services companies to relocate to these American owned islands in exchange for an exemption from 90% of income taxes and to stimulate the economy by hiring local workers and donating to local charitable causes As a result of this program the largest and poorest of these islands St Croix has played host to primarily US financial firms and their white managers leading to reinvigorated anxieties around the costs of racial capitalism and a feared return to the racial and gender order that ruled the islands during slavery Drawing on fieldwork conducted during the boom years leading up to the 2008 2009 financial crisis Virgin Capital provides ethnographic insight into the continuing relations of coloniality at work in the quintessentially modern industry of financial services and neoliberal development regimes with their grounding in hierarchies of race gender class and geopolitical positioning

Black Women, Academe, and the Tenure Process in the United States and the Caribbean Talia Esnard, Deirdre Cobb-Roberts, 2018-08-06 This book explores the meanings experiences and challenges faced by Black women faculty that are either on the tenure track or have earned tenure The authors advance the notion of comparative intersectionality to tease through the contextual peculiarities and commonalities that define their identities as Black women and their experiences with tenure and promotion across the two geographical spaces By so doing it works through a comparative treatment of existing social inequalities educational disparities and injustices in the promotion and retention of Black women academics Such interpretative examinations offer important insights into how Black women's subjugated knowledge and experiences continue to be suppressed within mainstream structures of power and how they are negotiated across contexts

Thinking Differently Gabrielle Griffin, Rosi Braidotti, 2002-10 This book is the first to ask whether there is a specifically European dimension to certain major issues in Women's Studies It strives to create a synergetic debate among different disciplines and cultural traditions in Europe and in doing so fills some gaps in our knowledge about women and enriches debates hitherto dominated by Anglo American influences Among the new areas of enquiry opened up in this book by the specificities of European Women's Studies are The fact that Europe has repeatedly experienced warfare on its own territory which has impacted significantly on women Hence the focus in this volume on women and militarism and on ethnic cleansing as an attack on the family The abidingly problematic relationship

between feminism and anti semitism and issues of migration and whiteness in a context where racism reflects the colonial histories of particular European countries The importance of passion and the emotions as well as psychoanalytical theory for politics particularly in Southern and Eastern European countries Current problems facing Europe including the decline of the welfare state the phenomenon of the single woman and the relationship between women s rights and human rights The diverse faces of feminist movements in particular European countries Reading feminism from a European perspective will enable readers to reflect upon the ways in which changes in political social and cultural positions and practices over the past century in Europe have impacted on feminist thinking and theorizing The volume raises important issues about the transfer of feminist concepts across cultures and languages And to English speaking audiences the volume also offers fresh viewpoints on some of the key debates in Women s Studies
