The Theater of Experiment Al Coppola, 2016 The Theater of Experiment explores the crucial role of spectacle in the establishment of modern science It analyzes eighteenth century theatrical representations of science in order to demonstrate how experimental natural philosophy was itself a kind of performing art that was shaped by a wider culture of spectacle in the Enlightenment

landownership as a crucial factor in the emergence of British women's independence during the long eighteenth century. Staking a claim to the nation's investment in land, women writers acquired a socio-political authority that otherwise eluded them. The landscapes that emerge in their writing testify to the socio-political power of land in this era.

Reimagining Illness Heather Meek, 2023-11-15. In eighteenth-century Britain, the worlds of literature and medicine were closely intertwined, and a diverse group of people participated in the circulation of medical knowledge. In this pre-professionalized milieu, several women writers made important contributions by describing a range of common yet often devastating illnesses. In *Reimagining Illness*, Heather Meek reads works by six major eighteenth-century women writers: Jane Barker, Anne Finch, Lady Mary Wortley Montagu, Hester Lynch Thrale Piozzi, Mary Wollstonecraft, and Frances Burney, alongside contemporaneous medical texts to explore conditions such as hysteria, melancholy, smallpox, maternity, consumption, and breast cancer. In novels, poems, letters, and journals, these writers drew on their learning and literary skill as they engaged with and revised male-dominated medical discourse. Their works provide insight into the experience of suffering and interrogate accepted theories of women's bodies and minds. In ways relevant both then and now, these women demonstrate how illness might be at once a bodily condition and a malleable construct full of ideological meaning and imaginative possibility. *Reimagining Illness* offers a new account of the vital period in medico-literary history between 1660 and 1815, revealing how the works of women writers not only represented the medicine of their time but also contributed meaningfully to its developments.

The Apothecary's Wife Karen Bloom Gevirtz, 2024-11-19. A lively medical, scientific, and economic history. Kirkus Reviews Starred Review, Best Nonfiction Books of 2024. Kirkus Reviews: A timely reminder that the current greed-based healthcare system is a relatively recent man-made scheme. Forbes: A groundbreaking genealogy of for-profit healthcare and an urgent reminder that centering women's history offers vital opportunities for shaping the future. The running joke in Europe for centuries was that anyone in a hurry to die should call the doctor. As far back as ancient Greece, physicians were notorious for administering painful and often fatal treatments and charging for the privilege. For the most effective treatment, the ill and injured went to the women in their lives. This system lasted hundreds of years. It was gone in less than a century. Contrary to the familiar story, medication did not improve during the Scientific Revolution. Yet somehow, between 1650 and 1740, the domestic female and the physician switched places in the cultural consciousness; she became the ineffective, potentially dangerous quack, and he the knowledgeable, trustworthy expert. The professionals normalized the idea of paying them for what people already got at home without charge, laying the foundation for Big Pharma and today's global for-profit medication system. A revelatory history of medicine, *The Apothecary's Wife* challenges the myths of the triumph of science and instead uncovers the fascinating truth. Drawing on a vast body of archival material, Karen Bloom Gevirtz depicts the extraordinary cast of characters who brought about this transformation. She also explores domestic medicine's values in responses to modern health crises such as the eradication of smallpox and what benefits we can learn from these events.
