Wonder Paul R. Fleischman, 2013-07 What do a marigold starlight over South Africa and the birth of a child have in common Every person plant and star springs up from information compounded by interaction We are embedded in an ancient intricate world Changing combinations of atoms pass through the long filter of history and natural law to form planet Earth whales and our own thoughts Based on the growth of evidence explaining how the world is put together we have become the first generation to have a narrative that unites electron motion to our breath and that connects hydrogen fusion in the sun to the energy that powers our own minds We can describe how the proteins in our mitochondria pinch and place into perfect position metal ions that were forged in exploding stars We cohere for a moment suspended between information order and transformation of all things This book is a scientific and literary exploration of those discoveries that reveal our deepest identity Through our urge to understand and communicate we have uncovered new meanings that infuse our days with wonder

Loy, 2015-02-10 Engage with a new vision of Buddhism and the modern world with the bestselling author of *Money Sex War Karma Notes for a Buddhist Revolution* David R Loy addresses head on the most pressing issues of Buddhist philosophy in our time What is the meaning of enlightenment is it an escape from the world or is it a form of psychological healing How can one reconcile modern scientific theory with ancient religious teachings What is our role in the universe Loy shows us that neither Buddhism nor secular society by itself is sufficient to answer these questions Instead he investigates the unexpected intersections of the two Through this exchange he uncovers a new Buddhist way one that is faithful to the important traditions of Buddhism but compatible with modernity This way we can see the world as it is truly is realize our indivisibility from it and learn that the world's problems are our problems This is a new path for a new world

The Definition, Practice, and Psychology of Vedanā John Peacock, Martine Batchelor, 2020-06-09 This book examines the importance of the topic of feeling tone vedan as it appears in early Buddhist texts and practice and also within contemporary secular mindfulness based interventions The volume aims to highlight the crucial nature of the feeling tone or taste of experience in determining mental reactivity behaviour character and ethics In the history of Buddhism and in its reception in contemporary discourse vedan has often been a much neglected topic with greater emphasis being accorded to other meditational focuses such as body and mind However feeling tone vedan can be seen as a crucial pivotal point in understanding the cognitive process both in contemporary mindfulness and meditation practice within more traditional forms of Buddhism The taste of experience it is claimed comes as pleasant unpleasant and neither pleasant nor unpleasant and these tones or tastes inevitably follow from humans being embodied sensory beings That experience comes in this way is unavoidable but what follows can be seen in terms of reactivity or responsiveness This book was originally published as a special issue of Contemporary Buddhism

Vipassana Meditation and the Scientific Worldview (2nd Edition) Paul R. Fleischman, 2020 We have lived in an era during which the spirituality intrinsic to science has become obvious The universe is not random It contains patterns and paths This is called the information state of the universe and it organizes the materials and energies that form our bodies and minds We are each microcosms downloaded into our small selves are a vast array of directives and limits the laws of science that govern stars as well as our hearts and minds We can gain access to some of the wisdom of this universal lawful reality through meditation As we observe our body sensations with equanimity we come in contact with basic laws of physics like entropy or the decay of aggregates over time and we also encounter basic laws of psychology like the fact that social love Mett leaves us happier than anger or fear We may become self balanced to face contingencies It is science not mysticism or religion that reveals the value of Vipassana as a vestibule to ultimate realities and highlights it as a practical guide to the psychology of well lived lives We are each unique snowflakes patterns and lace melting in the cosmic storm We arise and pass inside a universe a web a Dhamma We become aware of the scriptures that are inscribed inside us and that guide our

wellbeing *Judaism for the World* Arthur Green, 2020-09-22 An internationally recognized scholar and theologian shares a Jewish mysticism for our times Judaism one of the world's great spiritual traditions is not addressed to Jews alone In this masterful book Arthur Green calls out to seekers of all sorts offering a universal response to the eternal human questions of who we are why we exist where we are going and how to live Drawing on over half a century as a Jewish seeker and teacher he shows us a Judaism that cultivates the life of the spirit that inspires an inward journey leading precisely toward self transcendence to an awareness of the universal Self in whose presence we exist As a neo hasidic seeker he is both devotional and boldly questioning in his understanding of God and tradition Engaging with the mystical sources he translates the insights of the Hasidic masters into a new religious language accessible to all those eager to build an inner life and a human society that treasures the divine spark in each person and throughout Creation **The Power of Small Changes** Dr. Paul R. Fleischman, 2024-09-23 What do modern disciplines like biology psychology and the study of culture contribute to the understanding and practice of a classical meditation like Vipassana Following the encouragement given to him by the Vipassana teacher S N Goenka to explain this ancient tradition to contemporary audiences Dr Paul R Fleischman unites science and spirituality technical language and poetry logic and intuition in a manner that is as virtuosic as it is understandable *The Power of Small Changes* is a collection of decades of public talks and university lectures that speak to readers who have no previous knowledge of Vipassana as well as to experienced practitioners using down to earth explanations reinforced by academic knowledge and rigor While many of the chapters in this book have previously been shared online in various formats the present collection features newly revised and expanded content focusing on practical issues like how to maintain daily meditation practice coming to grips with the monkey mind understanding the evolutionary biology that meditation utilizes appreciating the role of teachers community and tradition and preserving its nonsectarianism The importance of a spiritual rather than a financial basis for Vipassana as well as the historical role of the Buddha are also clarified A uniquely valuable chapter discusses the safety of Vipassana explaining its contributions and limitations *In the Spirit of the Buddha* Paul R. Fleischman, Susan K. Fleischman, 2021-08-19 This collection of prose poems is based upon the teaching of the Buddha The selections have been chosen for inspiration rather than representing the full span of the teaching We have previously presented them as slides or read them aloud to friends on various occasions such as after workshops following assistant teacher meetings around fireplaces in national parks or after evening metta They have consistently been received with appreciation and have evoked multiple requests for their publication All of these compositions combine the Buddha's thoughts with contemporary phrasing They cannot be considered direct quotes from the Pali Canon because we have worked only with English language translations and because we have combined similar passages or modified the language for readability But at the same time we can't claim that these words are original to us because they are in the spirit of the Buddha They are brief poetic re speaking of some of the Buddha's most important ideas They are sparks from the

campfire that continue to glow in the dark Our intention is that these slides or pages will inspire meditators and nonmeditators alike They are written from the authentic experience of the troubling human condition and they speak from the standpoint of suffering and the Path out of suffering They are insights that have crossed the bridge of time from ancient India to today We hope you will find wisdom flowing through time on the river of words that originates in the ancient spring of the Pali Canon Paul R and Susan K Fleischman Relational Conversations on Meeting and Becoming Michal Barnea-Astrog, Mitchel Becker, 2022-12-30 Demonstrating a relational dialogic way of thinking and writing this book offers an innovative perspective on the human potential for intersubjective engagement and on the nature of true encounter The authors engage in creative associative dialogues and trialogues inspired by psychoanalysis and Buddhism poetry and religion theory and case studies academic and free styles of writing each enriching the other Reflecting on the essence of relating they convey a flow between inner private reveries and shared ones and between individual expressions of thought and evolvments of newly born thirds Through this interdisciplinary experimental setting the authors explore the possibility to reach truths and meanings that each individual would not have achieved on their own Offering new concepts and formulations that may nourish psychotherapists thought and be usefully implemented in their practice this book presents a pressingly unique and essential viewpoint for psychoanalysts and psychoanalytic psychotherapists in training and in practice
