Solutions Manual for Econometrics Badi H. Baltagi, 2014-09-01 This Third Edition updates the Solutions Manual for Econometrics to match the Fifth Edition of the Econometrics textbook. It adds problems and solutions using latest software versions of Stata and EViews. Special features include empirical examples using EViews and Stata. Missing Data Methods David M. Drukker, 2011-11-23 Contains 16 chapters authored by specialists in the field covering topics such as Missing Data Imputation in Nonstationary Panel Data Models, Markov Switching Models in Empirical Finance, Bayesian Analysis of Multivariate Sample Selection Models Using Gaussian Copulas, and Consistent Estimation and Orthogonality.

Econometric Evaluation of Socio-Economic Programs Giovanni Cerulli, 2022-11-02 This book provides advanced theoretical and applied tools for the implementation of modern micro-econometric techniques in evidence-based program evaluation for the social sciences. The author presents a comprehensive toolbox for designing rigorous and effective ex post program evaluation using the statistical software package Stata. For each method, a statistical presentation is developed, followed by a practical estimation of the treatment effects. By using both real and simulated data, readers will become familiar with evaluation techniques such as regression adjustment, matching, difference-in-differences, instrumental variables, regression discontinuity design, and synthetic control method, and are given practical guidelines for selecting and applying suitable methods for specific policy contexts. The second revised and extended edition features two new chapters on some recent developments of difference-in-differences. Specifically, chapter 5 introduces advanced difference-in-differences methods when many times are available and treatment can be either time-varying or fixed at a specific time. Chapter 6 introduces the synthetic control method, a treatment effect estimation approach suitable when only one unit is treated. Both chapters present applications using the software Stata.

Mekuriaw Bizuneh,2013 This study deals with three interrelated problems First it pursues the quest for local knowledge to understand climate variability and change at local levels Due to controversies uncertainties skepticism and embedded economic and political interests in the climate change discourse effective world collective action is more likely to delay for quite some time to come Moreover as climate change discourse remains very weak at engaging local knowledge policies that emanate from the discourse might be less responsive to local climate problems both in terms of policy ingredients and time frame So having highlighting the paramount importance of local knowledge this study documents and critically analyzes this knowledge system among subsistence farmers in Ethiopia Secondly it analyzes the economic impacts of climate variability and change and adaptation through quantitative methods with a special focus on crop production Finally it analyzes the factors that influence adaptive behavior In so doing it challenges the traditional approach of adaptation research and brings in a conceptual framework borrowed from psychosocial theory and empirically tests the approach in explaining adaptive behavior of farmers
